-----

**DESCRIPTION:**

Hemox-A Solution is a topical astringent solution of Aluminum Chloride. Gingival retraction can be achieved using a plain gingival retraction cord moistened with Hemox-A Solution.

**PRECAUTIONS:**

Discontinue use if irritation appears. For topical application only. Avoid eye contact.

**BENEFITS:**

Hemox-A Solution stops gingival bleeding fast. If you should inadvertently damage the gingival margin during tooth preparation or while placing a strip, band or a cervical matrix, moisten the area with Hemox-A Solution which will control and stop bleeding quickly. Hemox-A Solution contains no epinephrine. The use of vasoconstrictors for gingival retractions and bleeding is potentially dangerous and should be avoided. A plain gingival retraction cord can be dipped in Hemox-A Solution and then placed into the gingival sulcus for its hemostatic action.

**DIRECTIONS:**

Soak a cotton tipped applicator or a retraction cord with Hemox-A Solution. Apply to bleeding area with pressure until bleeding is stopped. Should a small dark coagulum appear, flush it away with water. This will have no effect on hemostatic action. Remove the impregnated cord from sulcus. Flush with water and dry with air. If hemostasis is not achieved, repeat application, rinse with water and air dry until bleeding is no longer present.

**CONTRAINDICATIONS:**

Do not use on patients with known history of hypersensitivity to aluminum chloride.

**CAUTIONS:**

**Keep out of reach of children.**

<p><b>HEMOX-A Hemostático Solución Tamponada</b></p> <p><b>DESCRIPCION:</b> Solucion Hemox-A es una solucion astringente a base de cloruro de aluminio. La retracion gingival puede ser lograda utilizando un hilo retractor gingival humedecido con la Solucion Hemox-A.</p> <p><b>PRECAUCIONES:</b> Descontinuar el uso de este producto en caso de irritacion. Para uso topico unicamente. Evitar contacto con los ojos.</p> <p><b>BENEFICIOS:</b> La solucion Hemox-A paraliza la hemorragia rapidamente. Si el margen gingival es dañado durante la preparación de la pieza o mientras se coloca una banda matriz o una banda cervical, humedecer el area con la</p>	<p>solucion Hemox-A la cual controlara la hemorragia inmediatamente. Solucion Hemox-A no contiene epinefrina. El uso de vasos constrictores para retracciones gingivales y hemorragias es potencialmente peligroso y debe de ser evitado. Un hilo retractor no impregnado se puede humedecer en la solucion Hemox-A y luego ser colocado en el surco gingival.</p> <p><b>INDICACIONES:</b> Humedecer un isopo con la solucion Hemox-A. Aplicar con presion en el area de la hemorragia hasta que la misma cese. Enjuagar con agua en caso de que se forme un coagulo oscuro. Esto no tendra ningun efecto en la accion hemastatica. Remover el hilo impregando del surco gingival. Enjuagar con agua y secar con aire. Si la hemostasis no es lograda, repetir la aplicacion, enjuagar con agua y secar con</p>	<p>aire hasta que la hemorragia cese completamente.</p> <p><b>CONTRAINDICACIONES:</b> Este producto no debe de ser utilizado por personas hipersensitivas al cloruro de aluminio.</p> <p><b>PRECAUCIONES:</b> Mantenga fuera del alcance de niños.</p> <p><b>PARA USO PROFESIONAL</b></p> <p>FABRICADO PARA: <b>keystone</b> INDUSTRIES 480 S.
