MEDIMOR

Information and directions on the use of medimor

Pharmaceutical company and manufacturer

Aquarium Münster Pahlsmeier GmbH | Galgheide 8 | D-48291 Telgte (Germany)

Name of the pharmaceutical product

medimor solution

Applications

Medication for the prevention and treatment of most infectious diseases affecting ornamental freshwater and seawater fish. medimor prevents many infectious diseases in ornamental fish, such as protozoan infections (e.g. Ichthyobodo, Chilodonella, Ichthyophthirius), bacterial infections (e.g. Columnaris) and fungal infections (e.g. Saprolegnia). medimor is particularly suitable in cases of uncertain diagnosis, providing a reliable means of defence against the majority of infections. Symptoms: Whitish to yellowish slimy deposits, cotton-wool like tufts, ulcerated skin, sores, inflammations, red spots, loss of skin and scales, raised scales, fin rot, cloudy mucous membranes, white fluffy patches around mouth, lurching movements (unusual racing around tank), protruding eyes (exophthalmus), swollen abdomen (abdominal dropsy).

Types and quantities of active substances:

1 ml medimor contains:

4.00 mg Ethacridine lactate monohydrate

2.75 mg Methylthionine chloride

2.00 mg Acriflavine chloride

0.26 mg Methyl orange

Contraindications and side effects

No known contraindications or side effects. Should you notice side effects in your ornamental fish, please inform your vet or pharmacist.

Species

Ornamental fish

Dosage instructions and method of administration

Shake well before use. Any ultraviolet light systems fitted in the tank must be turned off during treatment.

Day 1: Add 30 drops (= 1.5 ml) of medimor to the aquarium for each 100 l of water and stir to distribute. Do not feed the fish. Remove the filter from the aquarium and place it over a container to continue running in order to keep the microorganisms in the filter. Oxygenate the aquarium water. If the water cannot be oxygenated without operating the filter then we recommend running the filter without filtration media in order to ensure sufficient water circulation. In this case keep the filtration media in a container with plenty of aquarium water.

Day 2: Add 15 drops (= 0.75 ml) of medimor to the aquarium for each 100 l of water and stir to distribute. Do not feed the fish.

Day 3: Do not add any medication to the water. Feed the fish as normal. Change approx. 30 % of the aquarium water. Put the filter back into operation. If the filtration media has been stored separately then the water must not be put back in the aquarium. In this case partially wash the filtration media out with lukewarm water (not too thoroughly in order to retain some of the microorganisms) and put back in the filter.

Day 4, Day 5, Day 6: Do not add any medication to the water. Feed the fish as normal. Leave the filter running.

Day 7: Add 30 drops (= 1.5 ml) of medimor to the aquarium for each 100 l of water and stir to distribute. Do not feed the fish. Remove the filter from the aquarium and place it over a container to continue running in order to keep the microorganisms in the filter. Oxygenate the aquarium water. If the water cannot be oxygenated without operating the filter then we recommend running the filter without filtration media in order to ensure sufficient water circulation. In this case keep the filtration media in a container with plenty of aquarium water.

Day 8: Do not add any medication to the water. Feed the fish as normal. Change approx. 30 % of the aquarium water. Put the filter back into operation. If the filtration media has been stored separately then the water must not be put back in the aquarium. In this case partially wash the filtration media out with lukewarm water (not too thoroughly in order to retain some of the microorganisms) and put back in the filter.

Special precautions for storage

- Protect medimor from light. Store in its original packaging.
- Keep out of reach of children.

Special warnings

- medimor is unsuitable for invertebrates. Snails, mussels, shrimps, etc. must be excluded from the treatment.
- Do not use on creatures which are used to obtain food.
- The water will change colour due to the active ingredients but will return to normal again after a few days.

- Do not use after the use-by date has expired.

Special precautions for the disposal of unused pharmaceuticals

Take unused medical products and unfinished containers of medical products to the designated collection points.

Date of last revision of package insert

DE Arzneimittel für Zierfische gegen die meisten Infektionen im Süß- und Meerwasser:
 – Protozoen, z. B. Ichthyobodo (früher Costia), Chilodonella, Ichthyophthirius
 – Bakterien, z. B. Columnaris
 – Pilze, z. B. Saprolegnia

Symptome: Weißliche bis gelbliche, schleimige Beläge, watterartige Beläge, Geschwüre, Wunden, Entzündungen, Blutflecken, Verlust von Haut und Schuppen, Schuppensträub, Flossenfäule, Schleimhautirritationen, weiße Mäuler, Toirkeln (sog. Schaulkelkrankheit), hervorstehende Augen (Exophthalmus), aufgetriebene Bäuche (sog. Bauchwassersucht).

Wirkstoffe nach Art und Menge:

1 ml Lösung enthält:
 4,00 mg Ethacridinlactat-Monohydrat
 2,75 mg Methylthioninmonochlorid
 2,00 mg Acriflavinmonochlorid
 0,26 mg Methylorange

Pharmazeutischer Unternehmer und Hersteller:

Aquarium Münster Pahlmeier GmbH
 Gölghede 8

D-48291 Telgte (Germany)

Tierart: Zierfische

Art der Anwendung:

Lösung zum Zugabe in zum Aquarienwasser
Besondere Vorsichtsmaßnahmen für die Beseitigung von nicht verwendeten Arzneimitteln:
 Nicht aufgebrauchte Arzneimittel bei den entsprechenden Sammelstellen abgeben.

Darreichungsform: Lösung

Inhalt: 30 ml

Besondere Hinweise:

Arzneimittel für Kinder unzugänglich aufbewahren. Für Tiere. Nicht bei Tieren anwenden, die der Gewinnung von Lebensmitteln dienen. Nach Ablauf des Verfallsdatums nicht mehr anwenden. Medimor vor Licht schützen. In der Originalverpackung aufbewahren.

GB Treatment against most infections of ornamental fish in fresh water and marine water like:
 – Protozoa, e.g. Ichthyobodo (former Costia), Chilodonella, Ichthyophthirius (White Spot)
 – bacteria, e.g. Columnaris
 – fungi, e.g. Saprolegnia
Symptoms: White-yellowish and velvety-like coatings, cottonwool-like coatings, ulcers, wounds, inflammations, bloody spots, loss of skin and scales, raised scales, fin rot, cloudy membranes, white mouths, staggering, pop eye (Exophthalmus), swollen abdomen.

Types and quantities of active substances: 1 ml medimor contains:
 4.00 mg Ethacridine lactate monohydrate
 2.75 mg Methylthionine chloride
 2.00 mg Acriflavine chloride
 0.26 mg Methylorange

Pharmaceutical company and Manufacturer:

Aquarium Münster Pahlmeier GmbH
 Gölghede 8

D-48291 Telgte (Germany)

Species: ornamental fish

Method of administration:

Solution to be added to aquarium water
Special precautions for the disposal of unused pharmaceuticals:
 Take unused medical products and unfinished containers of medical products to the designated collection points.

Dosage form: Solution

Content: 30 ml

Special hints:

Keep out of reach of children. For veterinary use. Do not administer to animals that are for human consumption. Do not use after the expiry date. Protect medimor from light. Store in the original package.

FR Traitement très efficace qui lutte contre la plupart des maladies infectieuses des poissons d'ornement dans l'eau douce et l'eau de mer:

– Protozoaire, par ex. Ichthyobodo (anciennement Costia), Chilodonella, Ichthyophthirius

– Bactéries, par ex. Columnaris

– Champignons, par ex. Saprolegnia

Symptômes: sécrétions blanchâtres à jaunâtres, ulcères, inflammations, perte de la peau et des écailles, taches cutanées rouges (ou hémorragiques), décomposition des nageoires, mouvements oscillatoires, œil exorbité (exophthalmie), soles cottonneuses, ventre gonflé (hydropericé).

Composition des substances actives:

1 ml de médicament contient:
 4,00 mg Lactate d'éthacridine monohydraté
 2,75 mg Chlorure de méthylthionine
 2,00 mg Chlorure d'acriflavine
 0,26 mg Méthyle orange

Entrepreneur et fabricant pharmaceutique:

Aquarium Münster Pahlmeier GmbH
 Gölghede 8

D-48291 Telgte (Allemagne)

Espèces animale: poissons d'ornements

Mode d'emploi: Solution à ajouter dans l'eau d'aquarium

Précautions particulières à prendre pour l'élimination de médicaments non utilisés:
 Remettre les médicaments non utilisés aux points de collecte prévus à cet effet.

Forme posologique: Solution

Contenu: 30 ml

Consignes particulières:

Ne pas laisser à la portée des enfants. Pour animaux. Ne pas administrer aux animaux destinés à l'alimentation. Ne pas dépasser la date limite d'utilisation. Protéger des ampoules des rayons lumineux. A conserver dans l'emballage d'origine.

ES Medicamento contra la mayoría de enfermedades infecciosas de peces de acuario de agua dulce y salada:

– protozoos p.ej. ichthyobodo, chilodonella, ichthyophthirius

– bacterias p.ej. columnaris

– hongos p.ej. saprolegnia

Síntomas: Recubrimientos mucosos de color blanco/rojo amarillo, recubrimientos de fibra tipo algodón, llagas, heridas, inflamaciones, manchas de sangre, pérdida de piel y escamas, erizamiento de las escamas, protracción de las aletas, opacidad de las mucosas, boca blanca, tambaleo (denom. "enfermedad del vaivén"), ojos saltones (exophthalmus), vientos hinchados (hidropesía ventral).

Tipo y cantidad de ingrediente activo:

1 ml de solución contiene
 4,00 mg Lactato de etacridina monohidrato
 2,75 mg Metitioninio
 2,00 mg Acriflavina monoclóruo
 0,26 mg Naranja de metilo

Empresa farmacéutica y fabricante:

Aquarium Münster Pahlmeier GmbH
 Gölghede 8

D-48291 Telgte (Alemania)

Clase de animal: Peces de acuario

Modo de empleo:

Solución para la adición de agua

Medidas de precaución especiales para la eliminación de medicamentos no utilizados:

Entregar los medicamentos no consumidos en los lugares de recogida correspondientes.

La forma de dosificación: Solución

Contenido: 30 ml

Advertencias especiales:

Mantener fuera del alcance de los niños. Para los animales. No utilizar en animales destinados al consumo humano. No utilizar una vez vencida la fecha de caducidad. proteger medicamento de la luz. Guardar en el embalaje original.
