## DIRECTIONS FOR USE:

**Surgical hand scrub:**

- Use a sponge, if desired. Clean thoroughly under fingernails.
- Add a little water and develop copious suds.
- Rinse thoroughly under running water.
- Repeat entire procedure using another 5 cc of scrub.

**Antiseptic hand wash:**
- Wet hands with water and pour about 5 cc of scrub on hands.
- Rub hands vigorously together for at least 15 seconds, covering all surfaces.
- Rinse and dry with a disposable towel.

**Preoperative skin preparation:**
- After the surgical area is clipped, wet it with water.
- Apply scrub (1 cc is sufficient to cover an area of 20–30 square inches), develop lather, and scrub thoroughly for about 5 minutes.
