ASK INKEY

DID YOU KNOW OILY SKIN NEEDS HYDRATION TOO?

It's a common misconception that oily skin doesn't need hydration. Many people avoid moisturising, thinking it will make their skin more greasy. But the truth is, when skin isn't properly hydrated it can produce more oil to compensate, which can lead to breakouts.

How can you tell if your skin is dehydrated? If it feels tight, looks dull, or gets shiny quickly after cleansing, it could be a sign of dehydration.

We recommend layering with our Hyaluronic Acid Serum for lightweight, non-greasy hydration that keeps skin balanced, plump and healthy - without clogging pores.
