Ingrédient actif **Objectif**
Oxyde de zinc 20 % Crème solaire

Utilisation ■ Aide à prévenir les coups de soleil. ■ S'il est utilisé conformément aux autres mesures de protection solaire (voir le **Mode d'emploi**), il réduit le risque de cancer de la peau ainsi que le vieillissement prématuré de la peau causé par le soleil.

Avvertissements ■ Pour usage externe seulement. ■ Ne pas utiliser sur une peau endommagée ou lésée. ■ Lorsque vous utilisez ce produit, tenez-le éloigné des yeux. Rincez à l'eau. ■ Cessez l'utilisation et consultez un médecin si une éruption cutanée ou une irritation se développe et persiste. ■ Tenez hors de portée des enfants. En cas d'ingestion, demandez immédiatement une assistance médicale ou consultez un centre antipoison.

Mode d'emploi ■ Tous les jours, seul ou sous le maquillage. ■ Appliquez généreusement 15 minutes avant l'exposition au soleil et au besoin. ■ Renouvelez l'application toutes les 2 heures ou après avoir nagé, vous êtes séché avec une serviette, transpiré abondamment, lavé ou, dans le cas de produits appliqués sur les lèvres, après avoir mangé ou bu. ■ Utilisez la crème solaire résistante à l'eau si vous nagez ou transpirez. ■ Enfants de moins de 6 mois : demandez conseil à un médecin. ■ Mesures de protection solaire. Passer du temps au soleil augmente le risque de cancer de la peau et de vieillissement prématuré de la peau. Pour réduire ce risque, utilisez régulièrement un écran solaire avec un FPS à large spectre de 15 ou plus et d'autres mesures de protection solaire, notamment : ■ Limitez le temps passé au soleil, en particulier de 10 h à 14 h ■ Portez des chemises à manches longues, des pantalons et des lunettes de soleil.
