NDC 0004-0822-05
Tamiflu®
 (oseltamivir phosphate)
 for Oral Suspension

6 mg/mL

When constituted the usable volume of oral suspension is 60 mL, equivalent to 360 mg of oseltamivir free base.
Usual dosage: See package insert.
Storage: Store dry powder at 25°C (77°F); excursions permitted to 15°–30°C (59°–86°F).
Store constituted suspension under refrigeration for up to 17 days at 2°–8°C (36°–46°F). Do not freeze.
Alternatively, store constituted suspension for up to 10 days at 25°C (77°F); excursions permitted to 15°–30°C (59°–86°F). [See USP Controlled Room Temperature]. See insert.

Note to pharmacist:
 Contains 1 tamper-evident bottle.

 Prepare the suspension at time of dispensing:
 • Tap the closed bottle several times to loosen the powder.
 • Measure **55 mL** of water in a graduated cylinder.
 • Add the total amount of water for constitution to the bottle and shake the closed bottle well for 15 seconds.
 • Close bottle with child-resistant cap tightly and shake the closed bottle well for 15 seconds.
 • Dispense with patient package insert.

 Please ensure that your patient has an appropriate dosing device to correctly measure the oral suspension as prescribed.
