This Prior Approval supplemental new drug application provides for updates to the Prescribing Information (PI) to the Warnings and Precautions section to add the risk of nephrolithiasis with mesalamine. Other updates were made to the Warnings and Precautions section to include mesalamine safety information for the drug class.

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling with minor editorial revisions listed below and reflected in the enclosed labeling:

- Added a horizontal line between Highlights and the Table of Contents
- Updated the revision date in the PI and Patient Information to reflect the approval month

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at FDA.gov.[1] Content of labeling must be identical to the enclosed labeling (text for the Prescribing Information, Patient Package Insert), with the addition of any labeling changes in pending “Changes Being Effected” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

To facilitate review of your submission(s), provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version.
