<p><b>CHANTIX<sup>®</sup></b> <i>(varenicline) TABLETS</i></p> <p><b>Getting Started With CHANTIX.</b></p> <p>During the first week of taking CHANTIX (varenicline), you will slowly increase the dose over 7 days so CHANTIX can build up in your body. After you start taking CHANTIX, you can smoke until your quit date. There are 3 ways to take CHANTIX to help you quit and your quit date will depend on the quit approach. You and your doctor can decide which quit approach is best for you.</p> <p><b>How to Take CHANTIX.</b></p> <p>Remember to always take CHANTIX after eating and with a full glass (8 oz) of water. You will take CHANTIX for 12 or 24 weeks depending on your quit approach. It is important to take CHANTIX as prescribed by your doctor.</p> <p>This dosing schedule may not be right for everyone. Talk to your doctor if you're having side effects such as nausea, strange dreams, or sleep problems. Your doctor may reduce your dose. If you miss a dose of CHANTIX, take it as soon as you remember. If it is time for your next dose, skip the missed dose. Just take the next dose at your regular time.</p> <p>Please see enclosed Full Prescribing Information and Medication Guide.</p> <p>PF-CHA-USA-1085</p>		<p>To remove, push tablet through from the other side.</p>		<p>To remove, push tablet through from the other side.</p>		<p>To remove, push tablet through from the other side.</p>		<p>To remove, push tablet through from the other side.</p>
