ANDA 090576

Amneal Pharmaceuticals
Attention: Alpesh Patel
Associate Director, Regulatory Affairs
131 Chambers Brook Road
Branchburg, NJ 08876

Dear Sir:

This is in reference to your abbreviated new drug application (ANDA) dated May 14, 2008, submitted pursuant to section 505(j) of the Federal Food, Drug, and Cosmetic Act (the Act), for Nizatidine Oral Solution, 15 mg/mL.

Reference is also made to your amendments dated February 12, April 14, and August 20, 2009.

We have completed the review of this ANDA and have concluded that adequate information has been presented to demonstrate that the drug is safe and effective for use as recommended in the submitted labeling. Accordingly the ANDA is approved, effective on the date of this letter. The Division of Bioequivalence has determined your Nizatidine Oral Solution, 15 mg/mL, to be bioequivalent and, therefore, therapeutically equivalent to the reference listed drug (RLD), Axid Oral Solution, 15 mg/mL, of Braintree Laboratories, Inc. (Braintree).

The RLD upon which you have based your ANDA, Braintree's Axid Oral Solution, is subject to a period of patent protection. As noted in the agency's publication titled Approved Drug Products with Therapeutic Equivalence Evaluations (the "Orange Book"), U.S. Patent No. 6,930,119 (the '119 patent), is scheduled to expire on July 17, 2022.

Your ANDA contains a paragraph IV certification under section 505(j)(2)(A)(vii)(IV) of the Act stating that the '119 patent is invalid, unenforceable, or will not be infringed by your manufacture, use, or sale of Nizatidine Oral Solution, 15 mg/mL, under this ANDA. You have notified the agency that Amneal

Pharmaceuticals (Amneal) complied with the requirements of section 505(j)(2)(B) of the Act, and that no action for infringement of the ‘119 patent was brought against Amneal within the statutory 45-day period, which action would have resulted in a 30-month stay of approval under section 505(j)(5)(B)(iii).

With respect to 180-day generic drug exclusivity, we note that Amneal was the first ANDA applicant to submit a substantially complete ANDA with a paragraph IV certification to the '119 patent. Therefore, with this approval, Amneal is eligible for 180 days of generic drug exclusivity for Nizatidine Oral Solution, 15 mg/mL. This exclusivity, which is provided for under section 505(j)(5)(B)(iv) of the Act, will begin to run from the date of the commercial marketing identified in section 505(j)(5)(B)(iv). Please submit correspondence to this ANDA informing the agency of the date the exclusivity begins to run.

Under section 506A of the Act, certain changes in the conditions described in this ANDA require an approved supplemental application before the change may be made.

We note that if FDA requires a Risk Evaluation & Mitigation Strategy (REMS) for a listed drug, an ANDA citing that listed drug also will be required to have a REMS. See section 505-1(i) of the Act.

Postmarketing reporting requirements for this ANDA are set forth in 21 CFR 314.80-81 and 314.98. The Office of Generic Drugs should be advised of any change in the marketing status of this drug.

Promotional materials may be submitted to FDA for comment prior to publication or dissemination. Please note that these submissions are voluntary. If you desire comments on proposed launch promotional materials with respect to compliance with applicable regulatory requirements, we recommend you submit, in draft or mock-up form, two copies of both the promotional materials and package insert directly to:

Food and Drug Administration
Center for Drug Evaluation and Research
Division of Drug Marketing, Advertising, and Communications
5901-B Ammendale Road
Beltsville, MD 20705

We call your attention to 21 CFR 314.81(b)(3) which requires that all promotional materials be submitted to the Division of Drug Marketing, Advertising, and Communications with a completed Form FDA 2253 at the time of their initial use.

Within 14 days of the date of this letter, submit updated content of labeling [21 CFR 314.50(1)] in structured product labeling (SPL) format, as described at http://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm, that is identical in content to the approved labeling. Upon receipt and verification, we will transmit that version to the National Library of Medicine for public dissemination. For administrative purposes, please designate this submission as ***"Miscellaneous Correspondence - SPL for Approved ANDA 090576".***

Sincerely yours,

{See appended electronic signature page}

Gary Buehler
Director
