ANDA 091135

Tris Pharma, Inc.
Attention: W. Scott Groner
Director, Regulatory Affairs
2033 Route 130
Monmouth Junction, NJ 08852

Dear Sir:

This is in reference to your abbreviated new drug application (ANDA) dated January 9, 2009, submitted pursuant to section 505(j) of the Federal Food, Drug, and Cosmetic Act (the Act), for Dextromethorphan Polistirex Extended-release Oral Suspension, (equivalent to Dextromethorphan Hydrobromide, 30 mg/5 mL) (OTC).

Reference is made to the tentative approval letter issued by this office on April 20, 2011, and to your amendments dated August 3, August 11, and November 11, 2011.

We have completed the review of this ANDA and have concluded that adequate information has been presented to demonstrate that the drug is safe and effective for over-the-counter (OTC) use as recommended in the submitted labeling. Accordingly the ANDA is approved, effective on the date of this letter. The Division of Bioequivalence has determined your Dextromethorphan Polistirex Extended-release Oral Suspension, (equivalent to Dextromethorphan Hydrobromide, 30 mg/5 mL), to be bioequivalent to the reference listed drug product (RLD) Delsym Extended-release Cough Suppressant, 30 mg/5 mL, of Reckitt Benckiser. As noted in our communication dated July 28, 2011, your dissolution testing should be incorporated into the stability and quality control program using the same method proposed in your application.

The RLD upon which you have based your ANDA, Delsym Cough Suppressant of Reckitt Benckiser, is subject to a period of patent protection. As noted in the agency's publication titled Approved Drug Products with Therapeutic Equivalence Evaluations

(the “Orange Book”), U.S. Patent No. 5,980,882 (the '882 patent), is scheduled to expire on April 16, 2017.

Your ANDA contains a paragraph IV certification under section 505(j)(2)(A)(vii)(IV) of the Act stating that the ‘882 patent is invalid, unenforceable, or will not be infringed by your manufacture, use, or sale of Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg/5 mL, under this ANDA. You have notified the agency that Tris Pharma, Inc. (Tris) complied with the requirements of section 505(j)(2)(B) of the Act, and that litigation was initiated against Tris for infringement of the '882 patent within the statutory 45-day period in the United States District Court for the District of New Jersey [Reckitt Benckiser Inc. and UCB Manufacturing, Inc. v. Tris Pharma, Inc., Civil Action No. 09-cv-03125]. Although this litigation remains ongoing, the 30-month period identified in section 505(j)(5)(B)(iii) of the Act, during which time FDA was precluded from approving your ANDA, expired In addition, you have informed the agency that on December 21, 2011, the United States District Court granted Tris Pharma’s motion for summary judgment.

With respect to 180-day generic drug exclusivity, we note that Tris was the first ANDA applicant to submit a substantially complete ANDA with a paragraph IV certification to the '882 patent. Therefore, with this approval, Tris is eligible for 180-days of generic drug exclusivity for Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg/5 mL. This exclusivity, which is provided for under section 505(j)(5)(B)(iv) of the Act, will begin to run from the date of the commercial marketing identified in section 505(j)(5)(B)(iv). Please submit correspondence to this ANDA informing the agency of the date the exclusivity begins to run.

Under section 506A of the Act, certain changes in the conditions described in this ANDA require an approved supplemental application before the change may be made.

Postmarketing reporting requirements for this ANDA are set forth in 21 CFR 314.80-81 and 314.98. The Office of Generic Drugs should be advised of any change in the marketing status of this drug.

As soon as possible, but no later than 14 days from the date of this letter, submit, using the FDA automated drug registration and listing system (eLIST), the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format, as

described at http://www.fda.gov/ForIndustry/DataStandards/StructuredProductLabeling/default.htm, that is identical in content to the approved labeling (including the package insert, and any patient package insert and/or Medication Guide that may be required). Information on submitting SPL files using eLIST may be found in the guidance for industry titled "SPL Standard for Content of Labeling Technical Qs and As" at http://www.fda.gov/downloads/DrugsGuidanceComplianceRegulatoryInformation/Guidances/U_CM072392.pdf. The SPL will be accessible via publicly available labeling repositories.

Sincerely yours,

{See appended electronic signature page}

ANDA 091135Orig1s000

TENTATIVE APPROVAL LETTER

Food and Drug Administration
Rockville, MD 20857

ANDA 091135

Tris Pharma, Inc.
Attention: W. Scott Groner
Director, Regulatory Affairs and Compliance
2033 Route 130
Monmouth Junction, NJ 08852

Dear Sir:

This is in reference to your abbreviated new drug application (ANDA) dated January 9, 2009, submitted pursuant to section 505(j) of the Federal Food, Drug, and Cosmetic Act (the Act), for Dextromethorphan Polistirex Extended-release Oral Suspension, (Equivalent to Dextromethorphan Hydrobromide, 30 mg/5 mL) (OTC).

Reference is also made to your amendments dated August 14, September 25, October 9, and October 29, 2009; August 26, October 1, October 13, November 18, and December 16, 2010; and January 27, March 4, March 29, and April 14, 2011.

We have completed the review of this ANDA, and based upon the information you have presented to date we have concluded that the drug is safe and effective for use as recommended in the submitted labeling. However, we are unable to grant final approval to your ANDA at this time because of the patent issue noted below. Therefore, the ANDA is **tentatively approved**. This determination is based upon information available to the agency at this time (i.e., information in your ANDA and the status of current good manufacturing practices (cGMPs) of the facilities used in the manufacture and testing of the drug product). This determination is subject to change on the basis of new information that may come to our attention. This letter does not address issues related to the 180-day exclusivity provisions under section 505(j)(5)(B)(iv) of the Act.

The reference listed drug (RLD) upon which you have based your ANDA, Delsym Cough Suppressant, 30 mg/5 mL, of Reckitt Benckiser, is subject to a period of patent protection. As noted in the agency's publication titled Approved Drug Products with Therapeutic Equivalence Evaluations (the "Orange Book"), U.S. Patent No. 5,980,882 (the '882 patent), is scheduled to expire on April 16, 2017.

Your ANDA contains a paragraph IV certification under section 505(j)(2)(A)(vii)(IV) of the Act stating that the '882 patent is invalid, unenforceable, or will not be infringed by your manufacture, use, or sale of Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg/5 mL, under this ANDA. You notified the agency that Tris Pharma, Inc. (Tris) complied with the requirements of section 505(j)(2)(B) of the Act, and that litigation for infringement of the '882 patent was brought against Tris within the statutory 45-day period in the United States District Court for the District of New Jersey [Reckitt Benckiser Inc. and UCB Manufacturing, Inc. v. Tris Pharma, Inc., Civil Action No. 09-cv-03125].

Therefore, final approval cannot be granted until:

1. a. the expiration of the 30-month period provided for in section 505(j)(5)(B)(iii),

   b. the date the court decides[1] that the '882 patent is invalid or not infringed (see sections 505(j)(5)(B)(iii)(I), (II), and (III) of the Act), or

   c. the '882 patent has expired, and

2. The agency is assured there is no new information that would affect whether final approval should be granted.

Please note that if FDA requires a Risk Evaluation & Mitigation Strategy (REMS) for a listed drug, an ANDA citing that listed drug also will be required to have a REMS. See section 505-1(i) of the Act.

[1] This decision may be either a decision of the district court or the court of appeals, whichever court is the first to decide that the patent is invalid or not infringed.

To reactivate your ANDA prior to final approval, please submit a "MINOR AMENDMENT – FINAL APPROVAL REQUESTED" 90 days prior to the date you believe that your ANDA will be eligible for final approval. This amendment should provide the legal/regulatory basis for your request for final approval and should include a copy of a court decision, or a settlement or licensing agreement, as appropriate. It should also identify changes, if any, in the conditions under which the ANDA was tentatively approved, i.e., updated information such as final-printed labeling, chemistry, manufacturing, and controls data as appropriate. This amendment should be submitted even if none of these changes were made, and it should be designated clearly in your cover letter as a MINOR AMENDMENT – FINAL APPROVAL REQUESTED.

In addition to the amendment requested above, the agency may request at any time prior to the date of final approval that you submit an additional amendment containing the requested information. Failure to submit either or, if requested, both amendments may result in rescission of the tentative approval status of your ANDA, or may result in a delay in the issuance of the final approval letter.

Any significant changes in the conditions outlined in this ANDA as well as changes in the status of the manufacturing and testing facilities' compliance with current good manufacturing practices (cGMPs) are subject to agency review before final approval of the application will be made. Such changes should be categorized as representing either "major" or "minor" changes, and they will be reviewed according to OGD policy in effect at the time of receipt. The submission of multiple amendments prior to final approval may also result in a delay in the issuance of the final approval letter.

This drug product may not be marketed without final agency approval under section 505 of the Act. The introduction or delivery for introduction into interstate commerce of this drug product before the final approval date is prohibited under section 301 of the Act. Also, until the agency issues the final approval letter, this drug product will not be deemed to be approved for marketing under section 505 of the Act, and will not be listed in the "Orange Book."

For further information on the status of this application, or prior to submitting additional amendments, please contact Sarah Nguyen, Project Manager, at (240) 276-8467.

Sincerely yours,

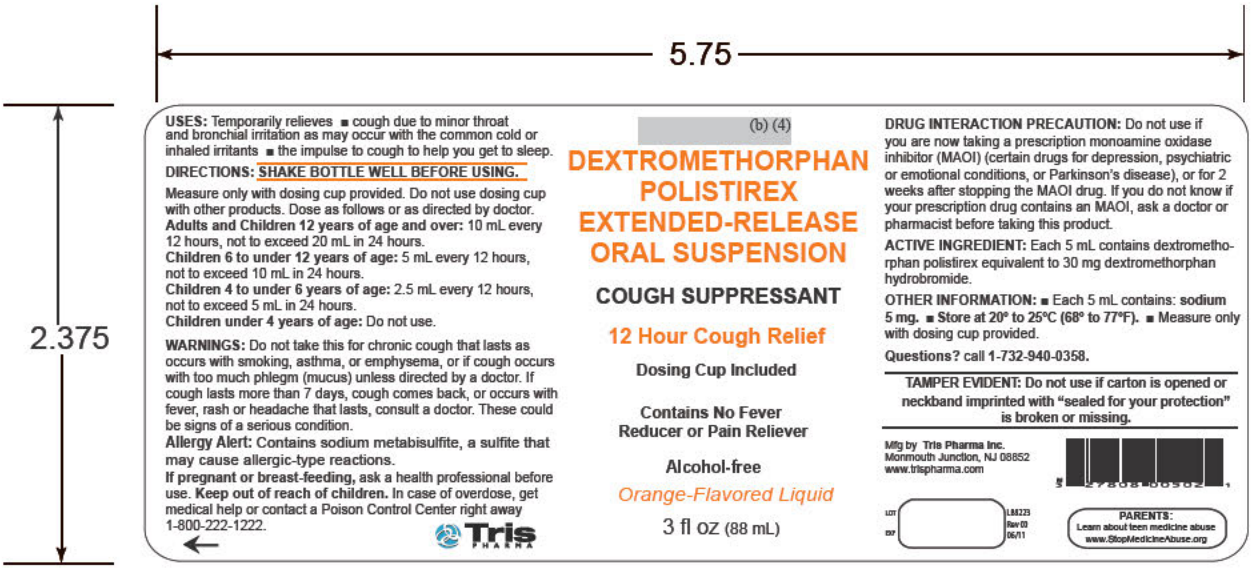
ANDA 091135Orig1s000

LABELING



USES: Temporarily relieves ■ cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants ■ the impulse to cough to help you get to sleep.

DIRECTIONS: **SHAKE BOTTLE WELL BEFORE USING.**

Measure only with dosing cup provided. Do not use dosing cup with other products. Dose as follows or as directed by doctor.
Adults and Children 12 years of age and over: 10 mL every 12 hours, not to exceed 20 mL in 24 hours.
Children 6 to under 12 years of age: 5 mL every 12 hours, not to exceed 10 mL in 24 hours.
Children 4 to under 6 years of age: 2.5 mL every 12 hours, not to exceed 5 mL in 24 hours.
Children under 4 years of age: Do not use.

WARNINGS: Do not take this for chronic cough that lasts as occurs with smoking, asthma, or emphysema, or if cough occurs with too much phlegm (mucus) unless directed by a doctor. If cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts, consult a doctor. These could be signs of a serious condition.
Allergy Alert: Contains sodium metabisulfite, a sulfite that may cause allergic-type reactions.
If pregnant or breast-feeding, ask a health professional before use. **Keep out of reach of children.** In case of overdose, get medical help or contact a Poison Control Center right away 1-800-222-1222.

Drug Facts

Active ingredient (in each 5 mL) — **Purpose**
Dextromethorphan polistirex equivalent to 30 mg dextromethorphan hydrobromide, USP.....Cough suppressant

Uses temporarily relieves
- cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants
- the impulse to cough to help you get to sleep

Warnings
Do not use if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.
Allergy Alert: Contains sodium metabisulfite, a sulfite that may cause allergic-type reactions.

Ask a doctor before use if you have
- chronic cough that lasts as occurs with smoking, asthma or emphysema
- cough that occurs with too much phlegm (mucus)

Stop use and ask a doctor if
- side effects occur. You may report side effects to FDA at 1-800-FDA-1088.
- cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts. These could be signs of a serious condition.

If pregnant or breast-feeding, ask a health professional before use.
Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away 1-800-222-1222.

Directions ■ **shake bottle well before use**
- measure only with dosing cup provided. Do not use dosing cup with other products.
- dose as follows or as directed by doctor
- mL = milliliter

adults and children 12 years of age and over	10 mL every 12 hours, not to exceed 20 mL in 24 hours
children 6 to under 12 years of age	5 mL every 12 hours, not to exceed 10 mL in 24 hours
children 4 to under 6 years of age	2.5 mL every 12 hours, not to exceed 5 mL in 24 hours
children under 4 years of age	do not use

Other information ■ each 5 mL contains: **sodium 5 mg**
■ store at 20° to 25°C (68° to 77°F) ■ dosing cup provided

Inactive ingredients D&C Red #30, D&C Yellow #10, flavor, glycerin, high fructose corn syrup, methylparaben, polysorbate 80,

If cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts, consult a doctor. These could be signs of a serious condition. **If pregnant or breast-feeding,** ask a health professional before use. **Keep out of reach of children.** In case of overdose, get medical help or contact a Poison Control Center right away.
DRUG INTERACTION PRECAUTION: Do not use if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.
ACTIVE INGREDIENT: Each 5 mL contains dextromethorphan polistirex equivalent to 30 mg dextromethorphan hydrobromide.
OTHER INFORMATION: Each 5 mL contains: **sodium 7 mg.**
Store at 20-25°C (68-77°F).

dextromethorphan polistirex extended-release suspension

COUGH SUPPRESSANT

12 Hour Cough Relief

Contains No Fever Reducer or Pain Reliever

SEE NEW DOSING DIRECTIONS

Alcohol-free

Grape-Flavored Liquid

148 mL (5 fl oz)

USES: Temporarily relieves ■ cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants ■ the impulse to cough to help you get to sleep.

DIRECTIONS: SHAKE BOTTLE WELL BEFORE USING.
Measure only with dosing cup provided. Do not use dosing cup with other products. Dose as follows or as directed by a doctor.
Adults and Children 12 years of age and over: 10 mL every 12 hours, not to exceed 20 mL in 24 hours.
Children 6 to under 12 years of age: 5 mL every 12 hours, not to exceed 10 mL in 24 hours.
Children 4 to under 6 years of age: 2.5 mL every 12 hours, not to exceed 5 mL in 24 hours.
Children under 4 years of age: Do not use.

WARNINGS: Do not take this product for chronic cough that lasts as occurs with smoking, asthma, or emphysema, or if cough occurs with too much phlegm (mucus) unless directed by a doctor. If cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts, consult a doctor. These could be signs of a serious condition.
If pregnant or breast-feeding, ask a health professional before use.
Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.

DRUG INTERACTION PRECAUTION: Do not use if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.

ACTIVE INGREDIENT: Each 5 mL contains dextromethorphan polistirex equivalent to 30 mg dextromethorphan hydrobromide.

OTHER INFORMATION: Each 5 mL contains: **sodium 7 mg.**
Store at 20°-25°C (68°-77°F).
Dosing cup provided.

Drug Facts

Active ingredient (in each 5 mL) — **Purpose**
Dextromethorphan polistirex equivalent to 30 mg dextromethorphan hydrobromide ..... Cough suppressant

Uses temporarily relieves
■ cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants
■ the impulse to cough to help you get to sleep

Warnings
Do not use if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.

Ask a doctor before use if you have
■ chronic cough that lasts as occurs with smoking, asthma or emphysema
■ cough that occurs with too much phlegm (mucus)

Stop use and ask a doctor if cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts. These could be signs of a serious condition.

If pregnant or breast-feeding, ask a health professional before use.
Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.

Directions ■ shake bottle well before use
■ measure only with dosing cup provided. Do not use dosing cup with other products.
■ dose as follows or as directed by a doctor

adults and children 12 years of age and over	10 mL every 12 hours, not to exceed 20 mL in 24 hours
children 6 to under 12 years of age	5 mL every 12 hours, not to exceed 10 mL in 24 hours
children 4 to under 6 years of age	2.5 mL every 12 hours, not to exceed 5 mL in 24 hours
children under 4 years of age	do not use

Other information ■ each 5 mL contains: sodium 7 mg
■ store at 20°-25°C (68°-77°F) ■ dosing cup provided

Inactive ingredients citric acid anhydrous, D&C Red #33, edetate disodium, ethylcellulose, FD&C Blue #1, flavor, high fructose corn syrup, methylparaben, polyethylene glycol 3350, polysorbate 80, propylene glycol, propylparaben, purified water, sucrose, trapicanth, vegetable oil, xanthan gum

Cc: Catterson, Debra M; Grace, John F; Hixon, Dena R
Subject: RE: Sulfites Warning PR (1985) and FR (1986)

Per 21 CFR 201.22 (b) states: (b) The labeling required by Sec. Sec. 201.57 and 201.100(d) for prescription drugs for human use containing a sulfite, except epinephrine for injection when intended for use in allergic or other emergency situations, shall bear the warning statement ``Contains (insert the name of the sulfite, e.g., sodium metabisulfite), a sulfite that may cause allergic-type reactions including anaphylactic symptoms and life-threatening or less severe asthmatic episodes in certain susceptible people. The overall prevalence of sulfite sensitivity in the general population is unknown and probably low. Sulfite sensitivity is seen more frequently in asthmatic than in nonasthmatic people.'' This statement shall appear in the ``Warnings'' section of the labeling.

As you can see that the sulfite warning statement is long and the statement is to be included in the Warning section of the insert. Should firm include in their labeling (container and carton) that this product contains sulfites in the principal display panel and/or warning section? Will this suffice?

I can't help but adding too that the apparent discrepancy in labeling requirements for OTC vs Rx doesn't make any sense --- why on earth should there be more of a buyer beware approach for OTC's? OTC's are supposed to be safer and more idiot-proof because of the lack of a learned intermediary. All the more reason to ask for the warning labeling.

Cc: Catterson, Debra M
Subject: RE: Sulfites Warning PR (1985) and FR (1986)

Given that the agency has gone so far as to identify a safety concern with this ingredient in at least some individuals, my own opinion is actually that we shouldn't be approving generics with such ingredients; however, since that doesn't seem to be the way the wind is blowing, I do agree that at least having some prominent labeling is appropriate. It is one thing to say that individuals with known sulfite sensitivities should know to look, but there is also a population out there who don't know, and a prominent sulfite warning might help them to identify and recognize a sulfite sensitivity.

Jeanne

The conditions of approval of an application OTC are not the same as monograph OTC. The FR notice provides an option for including a warning, so please go ahead and request the applicant to include a warning in the label to address the added risk in the ANDA formulation that is not present in the NDA. Adding a warning to the applications OTC generics will make us consistent in how we are handling the risk in the Rx generic product line.

Nancy/Dean

Subject: FW: Sulfites Warning PR (1985) and FR (1986)

Hi Jeanne,

Attached are the PR and FR for the Sulitfite Warning. Apparently, the agency decided that the warning was not needed on OTC drug products because the FDA felt that consumers with this allergy would know to read the ingredient list. In reviewing the rules, it seems that there was (or is) a "voluntary" option for the manufacture to place the warning on the label. I would presume that leaves the door open to perhaps ask the manufacture to place it on the label.

Please let me know if you have any additional questions.

DIVISION OF LABELING AND PROGRAM SUPPORT
LABELING REVIEW BRANCH

ANDA Number:	091135
Date of Submissions:	January 9, 2009 and October 29, 2009
Applicant's Name:	Tris Pharma, Inc.
Established Name:	Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg per 5 mL
Propriety Name:	None

Labeling Deficiencies:

A. CARTON LABELS:

1. We note that the [redacted] (b) (4) . Please revise so that the strength and the established name are prominent in the principal display panel.

2. In the "*Directions*" section, please add "Do not use dosing cup with other products."

3. In the "*DOSING*" section, please add "Measure only with dosing cup provided. Do not use dosing cup with other products." after "SHAKE WELL BEFORE USE."

B. CONTAINER LABELS:

In the "WARNINGS" section, please revise to read "Do not use if you are now taking a prescription Monoamine Oxidase Inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's Disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product."

Please submit labels and labeling in electronic format.

Prior to approval, it may be necessary to revise your labeling subsequent to approved changes for the reference listed drug. In order to keep ANDA labeling current, we suggest that you subscribe to the daily or weekly updates of new documents posted on the CDER web site at the following address - http://service.govdelivery.com/service/subscribe.html?code=USFDA_17.

To facilitate review of your next submission please provide a side-by-side comparison of your proposed labeling with the last approved labeling of the Reference Listed Drug with all differences annotated and explained.

BASIS OF APPROVAL:
APPROVAL SUMMARY

CONTAINER LABELS:
Please see comments above.

CARTON LABELS:
Please see comments above.

BASIS OF APPROVAL:

Was this approval based upon a petition? No
What is the RLD on the 356(h) form: Delsym® (Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg per 5 mL)
NDA Number: 018658
NDA Drug Name: Delsym® (Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg per 5 mL)
NDA Firm: Reckitt Benckiser Inc.
Date of Approval of NDA Insert and supplement #: 018658/S-027 (approved April 8, 2010)
Has this been verified by the MIS system for the NDA? Yes – see note in FTR below
Was this approval based upon an OGD labeling guidance? No
Other Comments:

FOR THE RECORD:

1. **Model Labeling**:

Review is based on the labeling of Reckitt Benckiser Inc.'s Delsym®", NDA 018658/S-027, approved 4/8/2010.

2. **Patents and Exclusivities (P&E):**

Patent and Exclusivity Search Results from query on Appl No 018658 Product 001 in the OB_OTC list.

Appl No	Prod No	Patent No	Patent Expiration	Drug Substance Claim	Drug Product Claim	Patent Use Code	Delist Requested
N018658	001	5980882	Apr 16, 2017		Y		

There is no unexpired exclusivity for this product.

Firm filed PIV and was sued.

3. **Inactive Ingredients :**

The listing of inactive ingredients are: D&C Red #30, D&C Yellow #10, flavor, glycerin, high fructose corn syrup, methylparaben, polysorbate 80, polyvinyl acetate, povidone, propylparaben, purified water, sodium metabisulfite, sodium polystyrene sufonate, sucrose, tartaric acid, tragacanth gum, triacetin, and xanthan gum.

4. **Manufacturing Facility (3.2.P.3.1):**

3.2.P.3.1 Manufacturer

This module contains information regarding the drug product manufacturer for Dextromethorphan Polistirex Extended Release Oral Suspension, including manufacturer address, responsibility, registration number, and cGMP statement.

1. Manufacturer Address:

Tris Pharma, Inc.
2033 Route 130
Monmouth Junction, NJ 08852
Contact: W. Scott Groner
Phone: 732-940-0358

5. **Product Description:**

RLD (Delsym®)

Available in 3 fl oz and 5 fl oz grape and orange flavors for both pediatric and adult graphics.

US Pat. 5,980,882 0245657 062109 Lot:

Delsym

dextromethorphan polistirex extended-release suspension

COUGH SUPPRESSANT

12 Hour Cough Relief

Contains No Fever Reducer or Pain Reliever

SEE NEW DOSING DIRECTIONS

Alcohol-free

Grape-Flavored Liquid

148 mL (5 fl oz)

USES: Temporarily relieves ■ cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants ■ the impulse to cough to help you get to sleep.

DIRECTIONS: SHAKE BOTTLE WELL BEFORE USING.
Measure only with dosing cup provided. Do not use dosing cup with other products. Dose as follows or as directed by a doctor.
Adults and Children 12 years of age and over: 10 mL every 12 hours, not to exceed 20 mL in 24 hours.
Children 6 to under 12 years of age: 5 mL every 12 hours, not to exceed 10 mL in 24 hours.
Children 4 to under 6 years of age: 2.5 mL every 12 hours, not to exceed 5 mL in 24 hours.
Children under 4 years of age: Do not use.

WARNINGS: Do not take this product for chronic cough that lasts as occurs with smoking, asthma, or emphysema, or if cough occurs with too much phlegm (mucus) unless directed by a doctor. If cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts, consult a doctor. These could be signs of a serious condition.
If pregnant or breast-feeding, ask a health professional before use.
Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.
DRUG INTERACTION PRECAUTION: Do not use if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.
ACTIVE INGREDIENT: Each 5 mL contains dextromethorphan polistirex equivalent to 30 mg dextromethorphan hydrobromide.
OTHER INFORMATION: Each 5 mL contains: **sodium 7 mg.**
Store at 20°-25°C (68°-77°F).
Dosing cup provided.

Drug Facts

Active ingredient (in each 5 mL)	Purpose
Dextromethorphan polistirex equivalent to 30 mg dextromethorphan hydrobromide	Cough suppressant

Uses temporarily relieves
- cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants
- the impulse to cough to help you get to sleep

Warnings
Do not use if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.

Ask a doctor before use if you have
- chronic cough that lasts as occurs with smoking, asthma or emphysema
- cough that occurs with too much phlegm (mucus)

Stop use and ask a doctor if cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts. These could be signs of a serious condition.
If pregnant or breast-feeding, ask a health professional before use.
Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.

Directions ■ shake bottle well before use
- measure only with dosing cup provided. Do not use dosing cup with other products.
- dose as follows or as directed by a doctor

adults and children 12 years of age and over	10 mL every 12 hours, not to exceed 20 mL in 24 hours
children 6 to under 12 years of age	5 mL every 12 hours, not to exceed 10 mL in 24 hours
children 4 to under 6 years of age	2.5 mL every 12 hours, not to exceed 5 mL in 24 hours
children under 4 years of age	do not use

Other information ■ each 5 mL contains: **sodium 7 mg**
■ store at 20°-25°C (68°-77°F) ■ dosing cup provided

Inactive ingredients citric acid anhydrous, D&C Red #33, edetate disodium, ethylcellulose, FD&C Blue #1, flavor, high fructose corn syrup, methylparaben, polyethylene glycol 3350, polysorbate 80, propylene glycol, propylparaben, purified water, sucrose, tragacanth, vegetable oil, xanthan gum

The Executive Summary

I. Recommendations

A. Recommendation and Conclusion on Approvability

*The ANDA is **Approvable.***

B. Recommendation on Phase 4 (Post-Marketing) Commitments, Agreements, and/or Risk Management Steps, if Approvable

N/A

II. Summary of Chemistry Assessments

A. Description of the Drug Product(s) and Drug Substance(s)

a. Drug Substance

(i). Description of drug substance

Dextromethorphan Hydrobromide is practically white crystals or crystalline powder, having a faint odor. It is an USP subject. It is sparingly soluble in water; freely soluble in alcohol and in chloroform; insoluble in ether. Its polymorphic form is not reported in literature and not determined either by the applicant.

(ii). Manufacturer of drug substance

Dextromethorphan Hydrobromide drug substance is manufactured by:

(b) (4)

b. Drug Product

(i). Description of drug product

The drug product, Dextromethorphan Polistirex Extended Release Oral Suspension, eq. to 30 mg Dextromethorphan Hydrobromide Per 5 mL is an orange viscous suspension.

(ii). Components of drug product

The drug product contains the following components:

Glycerin USP
Dextromethorphan Hydrobromide USP
High Fructose Corn Syrup
Polysorbate 80 NF
Polyvinyl Acetate (b) (4)
Povidone USP
Methylparaben NF

Propylparaben NF
Sodium Metabisulfite NF
Sodium Polystyrene Sulfonate USP
Sucrose NF
Tartaric Acid NF
Tragacanth Gum NF
Triacetin USP
Xanthan Gum NF
D&C Red No.30 (b) (4)
D&C Yellow No.10 (b) (4)
Flavor (b) (4)
Purified Water USP

No overage appears in drug product. No safety concerns from any excipient.

(iii). Manufacturing process of drug product

The manufacturing process involves the following steps:

(b) (4)

(iv). Test methods for drug product

(b) (4)

Comparison of dissolution method and specifications proposed by the applicant initially and revised specification per FDA recommendation:

Parameter	Proposed by Tris Pharma initially	Revised per FDA Recommendation
Apparatus Speed Medium Volume Temperature	Paddle II 50 rpm 0.1N HCl + 400 mL phosphate buffer after 1 h 500 mL 37 °C	(*The same as proposed by the firm*)
Specification	1 hr: NMT (b) (4) % 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: NLT (b) (4) %	1 hr: **NMT** (b) (4) **%** 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: NLT (b) (4) %

(b) (4)

(b) (4)

[redacted]

(vii). Storage conditions

Based on the labeling, the storage condition for Tris Pharma's drug product is described as below:

Store at 20°-25°C (68°-77°F)

(viii). Expiration Date

The proposed expiration data for the drug product is ***24 months*** for the proposed marketing container/closure systems.

B. Description of How the Drug Product is Intended to be Used

INDICATIONS AND USAGE

Temporarily relieves cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants.

DOSAGE AND ADMINISTRATION

Adults and Children 12 years of age and over:	(b) (4) (10 mL) in 12 h, NMT 20 mL in 24 h
Children 6 to under 12 years of age:	(5 mL) in 12 h, NMT 10 mL in 24 hours
Children 4 to under 6 years of age:	(5 mL) in 12 h, NMT 5 mL in 24 hours

HOW SUPPLIED

Tamper-evident container/closure system with the following statement on bottle label: "TAMPER EVIDENT: Do not use if carton is opened, or if neckband printed "sealed for your protection" is broken or missing".

STORAGE CONDITION:

Store at 20°-25°C (68°-77°F)

C. Basis for Approvability or Not-Approval Recommendation

The CMC section of this ANDA is ***approvable***.

* The FDA accepted the applicant's dissolution method but recommended a revision of the dissolution specification on 9-3-09. Tris Pharma accepted the FDA recommended dissolution specification on 10-9-09 and all dissolution data provided up to date met the revised specifications.

19. ORDER OF REVIEW:

The application submission(s) covered by this review was taken in the date order of receipt.

Yes __X__ No _____ If no, explain reason(s) below:

The Executive Summary

I. Recommendations

A. Recommendation and Conclusion on Approvability

*The ANDA is **Approvable.***

B. Recommendation on Phase 4 (Post-Marketing) Commitments, Agreements, and/or Risk Management Steps, if Approvable

N/A

II. Summary of Chemistry Assessments

A. Description of the Drug Product(s) and Drug Substance(s)

a. Drug Substance

(i). Description of drug substance

Dextromethorphan Hydrobromide is practically white crystals or crystalline powder, having a faint odor. It is an USP subject. It is sparingly soluble in water; freely soluble in alcohol and in chloroform; insoluble in ether. Its polymorphic form is not reported in literature and not determined either by the applicant.

(ii). Manufacturer of drug substance

Dextromethorphan Hydrobromide drug substance is manufactured by:

(b) (4)

b. Drug Product

(i). Description of drug product

The drug product, Dextromethorphan Polistirex Extended Release Oral Suspension, eq. to 30 mg Dextromethorphan Hydrobromide Per 5 mL is an orange viscous suspension.

(ii). Components of drug product

The drug product contains the following components:

Glycerin USP
Dextromethorphan Hydrobromide USP
High Fructose Corn Syrup
Polysorbate 80 NF
Polyvinyl Acetate (b) (4)
Povidone USP
Methylparaben NF

Propylparaben NF
Sodium Metabisulfite NF
Sodium Polystyrene Sulfonate USP
Sucrose NF
Tartaric Acid NF
Tragacanth Gum NF
Triacetin USP
Xanthan Gum NF
D&C Red No.30 (b) (4)
D&C Yellow No.10 (b) (4)
Flavor (b) (4)
Purified Water USP

No overage appears in drug product. No safety concerns from any excipient.

(iii). Manufacturing process of drug product

The manufacturing process involves the following steps:

(b) (4)

(iv). Test methods for drug product

(b) (4)

Comparison of dissolution method and specifications proposed by the applicant and recommended by the FDA:

Parameter	Proposed by Tris Pharma initially	Revised per FDA Recommendation
Apparatus	Paddle II	(*The same as proposed by the firm*)
Speed	50 rpm	
Medium	0.1N HCl + 400 mL phosphate buffer after 1 h	
Volume	500 mL	
Temperature	37 °C	
Specification	1 hr: NMT (b) (4) % 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: NLT (b) (4) %	1 hr: NMT (b) (4) % 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: ***NLT*** (b) (4) *%*

(b) (4)

(b) (4)

[redacted]

(vii). Storage conditions

Based on the labeling, the storage condition for Tris Pharma's drug product is described as below:

Store at 20°-25°C (68°-77°F)

(viii). Expiration Date

The proposed expiration data for the drug product is ***24 months*** for the proposed marketing container/closure systems.

B. Description of How the Drug Product is Intended to be Used

INDICATIONS AND USAGE

Temporarily relieves cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants.

DOSAGE AND ADMINISTRATION

Adults and Children 12 years of age and over:	(b) (4) (10 mL) in 12 h, NMT 20 mL in 24 h
Children 6 to under 12 years of age:	(5 mL) in 12 h, NMT 10 mL in 24 hours
Children 4 to under 6 years of age:	(5 mL) in 12 h, NMT 5 mL in 24 hours

HOW SUPPLIED

Tamper-evident container/closure system with the following statement on bottle label: "TAMPER EVIDENT: Do not use if carton is opened, or if neckband printed "sealed for your protection" is broken or missing".

STORAGE CONDITION:

Store at 20°-25°C (68°-77°F)

C. Basis for Approvability or Not-Approval Recommendation

The CMC section of this ANDA is ***approvable***.

The Chemistry Review for ANDA 91-135

The Executive Summary

I. Recommendations

A. Recommendation and Conclusion on Approvability

*The ANDA is **Not Approvable.*** It's recommended a minor not approvable deficiency letter be sent to the sponsor.

B. Recommendation on Phase 4 (Post-Marketing) Commitments, Agreements, and/or Risk Management Steps, if Approvable

N/A

II. Summary of Chemistry Assessments

A. Description of the Drug Product(s) and Drug Substance(s)

a. Drug Substance

(i). *Description of drug substance*

Dextromethorphan Hydrobromide is practically white crystals or crystalline powder, having a faint odor. It is an USP subject. It is sparingly soluble in water; freely soluble in alcohol and in chloroform; insoluble in ether. Its polymorphic form is not reported in literature and not determined either by the applicant.

(ii). *Manufacturer of drug substance*

Dextromethorphan Hydrobromide drug substance is manufactured by:

(b) (4)

b. Drug Product

(i). *Description of drug product*

The drug product, Dextromethorphan Polistirex Extended Release Oral Suspension, eq. to 30 mg Dextromethorphan Hydrobromide Per 5 mL is an orange viscous suspension.

(ii). *Components of drug product*

The drug product contains the following components:

Glycerin USP
Dextromethorphan Hydrobromide USP
High Fructose Corn Syrup
Polysorbate 80 NF
Polyvinyl Acetate (b) (4)
Povidone USP
Methylparaben NF
Propylparaben NF
Sodium Metabisulfite NF
Sodium Polystyrene Sulfonate USP
Sucrose NF
Tartaric Acid NF
Tragacanth Gum NF
Triacetin USP
Xanthan Gum NF
D&C Red No.30 (b) (4)
D&C Yellow No.10 (b) (4)
Flavor (b) (4)
Purified Water USP

No overage appears in drug product. No safety concerns from any excipient.

(iii). Manufacturing process of drug product

The manufacturing process involves the following steps:

- (b) (4)
-
-
-
-

(iv). Test methods for drug product

(b) (4)

Comparison of dissolution method and specifications proposed by the applicant and recommended by the FDA:

Parameter	Proposed by Tris Pharma initially	Revised per FDA Recommendation
Apparatus Speed Medium Volume Temperature	Paddle II 50 rpm 0.1N HCl + 400 mL phosphate buffer after 1 h 500 mL 37 °C	(*The same as proposed by the firm*)
Specification	1 hr: NMT (b) (4) % 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: NLT (b) (4) %	1 hr: NMT (b) (4) % 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: ***NLT*** (b) (4) %

(b) (4)

[redacted]

(vii). Storage conditions

Based on the labeling, the storage condition for Tris Pharma's drug product is described as below:

Store at 20°-25°C (68°-77°F)

(viii). Expiration Date

The proposed expiration data for the drug product is ***24 months*** for the proposed marketing container/closure systems.

B. Description of How the Drug Product is Intended to be Used

INDICATIONS AND USAGE

Temporarily relieves cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants.

DOSAGE AND ADMINISTRATION

Adults and Children 12 years of age and over:	(b) (4) [redacted] (10 mL) in 12 h, NMT 20 mL in 24 h
Children 6 to under 12 years of age:	(5 mL) in 12 h, NMT 10 mL in 24 hours
Children 4 to under 6 years of age:	(5 mL) in 12 h, NMT 5 mL in 24 hours

HOW SUPPLIED

Tamper-evident container/closure system with the following statement on bottle label: "TAMPER EVIDENT: Do not use if carton is opened, or if neckband printed "sealed for your protection" is broken or missing".

STORAGE CONDITION:

Store at 20°-25°C (68°-77°F)

C. Basis for Approvability or Not-Approval Recommendation

CMC of this ANDA is ***not approvable***. Dissolution method is ***acceptable*** but dissolution specification is ***deficient***. Labeling and bioequivalence sections are ***pending*** for review. EES is ***Acceptable***. This ANDA is ***Not Approvable***.

II. Summary of Chemistry Assessments

A. Description of the Drug Product(s) and Drug Substance(s)

a. Drug Substance

(i). *Description of drug substance*

Dextromethorphan Hydrobromide is practically white crystals or crystalline powder, having a faint odor. It is an USP subject. It is sparingly soluble in water; freely soluble in alcohol and in chloroform; insoluble in ether. Its polymorphic form is not reported in literature and not determined either by the applicant.

(ii). *Manufacturer of drug substance*

Dextromethorphan Hydrobromide drug substance is manufactured by:

(b) (4)

b. Drug Product

(i). *Description of drug product*

The drug product, Dextromethorphan Polistirex Extended Release Oral Suspension, eq. to 30 mg Dextromethorphan Hydrobromide Per 5 mL is an orange viscous suspension.

(ii). *Components of drug product*

The drug product contains the following components:

Glycerin USP

Dextromethorphan Hydrobromide USP
High Fructose Corn Syrup
Polysorbate 80 NF
Polyvinyl Acetate (b) (4)
Povidone USP
Methylparaben NF
Propylparaben NF
Sodium Metabisulfite NF
Sodium Polystyrene Sulfonate USP
Sucrose NF
Tartaric Acid NF
Tragacanth Gum NF
Triacetin USP
Xanthan Gum NF
D&C Red No.30 (b) (4)
D&C Yellow No.10 (b) (4)
Flavor (b) (4)
Purified Water USP

No overage appears in drug product. No safety concerns from any excipient.

(iii). Manufacturing process of drug product

The manufacturing process involves the following steps:

(b) (4)

(iv). Test methods for drug product

(b) (4)

Comparison of dissolution method and specifications proposed by the applicant and recommended by the FDA:

Parameter	Proposed by Tris Pharma initially	Revised per FDA Recommendation
Apparatus	Paddle II	(*The same as proposed by the firm*)
Speed	50 rpm	
Medium	0.1N HCl + 400 mL phosphate buffer after 1 h	
Volume	500 mL	
Temperature	37 °C	
Specification	1 hr: NMT (b) (4) % 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: NLT (b) (4) %	1 hr: NMT (b) (4) % 3 hr: (b) (4) % 6 hr: (b) (4) % 12 hr: ***NLT*** (b) (4) *%*

(v). Executed batch and proposed production batches

(b) (4)

[redacted]

(vii). Storage conditions

Based on the labeling, the storage condition for Tris Pharma's drug product is described as below:

Store at 20°-25°C (68°-77°F)

(viii). Expiration Date

The proposed expiration data for the drug product is ***24 months*** for the proposed marketing container/closure systems.

B. Description of How the Drug Product is Intended to be Used

INDICATIONS AND USAGE

Temporarily relieves cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants.

DOSAGE AND ADMINISTRATION

Adults and Children 12 years of age and over:	(b) (4) (10 mL) in 12 h, NMT 20 mL in 24 h
Children 6 to under 12 years of age:	(5 mL) in 12 h, NMT 10 mL in 24 hours
Children 4 to under 6 years of age:	(5 mL) in 12 h, NMT 5 mL in 24 hours

HOW SUPPLIED

Tamper-evident container/closure system with the following statement on bottle label: "TAMPER EVIDENT: Do not use if carton is opened, or if neckband printed "sealed for your protection" is broken or missing".

STORAGE CONDITION:

Store at 20°-25°C (68°-77°F)

C. Basis for Approvability or Not-Approval Recommendation

CMC of this ANDA is ***not approvable***. Dissolution method is ***acceptable*** but dissolution specification is ***deficient***. Labeling and bioequivalence sections are ***pending*** for review. EES is ***pending***. This ANDA is ***Not Approvable***.

B. In addition to responding to the deficiencies presented above, please note and acknowledge the following comments in your response:

1. Please update your room temperature stability data and provide all available data in your next amendment.

2. The review of the labeling and bioequivalence portions of your application are pending. After the reviews are complete, any deficiencies found will be communicated to you under separate covers.

3. The firms referenced in the application relative to the manufacture and testing of the product must be in compliance with cGMPs at the time of approval.

4. Please be advised that the use of in-house or modified compendial analytical methods for testing the drug substance does not relieve you from meeting the compendial standards. In the event of a dispute, the official USP methods will prevail.

Sincerely yours,

Vilayat A. Sayeed, Ph.D.

ADDENDUM

1 EXECUTIVE SUMMARY

This is an addendum to the previous DBE review which is located in DARRTS [for ANDA #091135 DEHAVEN, WAYNE I 03/24/2011 N/A 03/24/2011 REV-BIOEQ-01(General Review) Original-1 Archive].

In the amendment dated March 4, 2011, Tris Pharma submitted additional information with regard to the dissolution specifications. Specifically, Tris Pharma requested the DBE revisit the 1 hour specification of *NMT* (b)(4)*%*. Tris Pharma is recommending a 1 hour specification of *NMT* (b)(4)*%*. To support their claim, the firm submitted additional stability testing (i.e. dissolution testing results taken every 3 months up to 2 years) on the bio-lot #TB-023A, as well as 0 month testing on a second lot (TB-081A).

These data were overlooked in the previous DBE review mentioned above. This addendum addresses the firms request to change the 1 hour specification from *NMT* (b)(4)*%* to *NMT* (b)(4)*%*.

Because of the firm's request the DBE revisited the 1 hour dissolution specification (NMT (b)(4)%) of the test biolot. As stated on page 17 of the *"Guidance for Industry for Extended Release Oral Dosage Forms: Development, Evaluation, and Application of In Vitro/In Vivo Correlations"* the dissolution specification is set from the fresh biolot (not on the dissolution of the stored biolot) by adding $\pm$ 10% to the mean % dissolution. Since for the first time point (1 hr) of the test drug product the mean % dissolution of the biolot TB-023A is (b)(4)%, the DBE considers (b)(4)% to (b)(4)% or NMT (b)(4)% as the appropriate specification. Our earlier specification NMT (b)(4)% is overly strict and is not keeping with the guidance. The DBE therefore accepts the firm's request to modify the 1 hour specification of its test product from *NMT* (b)(4)*%* to *NMT* (b)(4)*%* based on the submitted dissolution data from the fresh biolot and based on Guidance for Industry recommendations. However, the firm is informed that the revised specification was not based on stability data submitted in the amendment.

The application is **complete (adequate)**.

2 TABLE OF CONTENTS

3 BACKGROUND

There are four (4) Division of Bioequivalence (DBE) reviews for this application which are located in DARRTS. These reviews are as follows:

1. First Generic Checklist: KITCHENS, KELLY M 04/28/2009 N/A 04/28/2009 FRM-ADMIN-44(DBE Review Request) Original-1 Archive. The submission was found acceptable for filing.

2-3. Two 'dissolution only' reviews: PALAMAKULA, ANITHA 06/25/2009 N/A 06/25/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive and PALAMAKULA, ANITHA 09/03/2009 N/A 09/03/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive. Per the second 'dissolution only' review, the firm was asked to acknowledge dissolution method and specification.

4. The "full ANDA" review: DEHAVEN, WAYNE I 02/14/2011 N/A 02/14/2011 REV-BIOEQ-01(General Review) Original-1 Archive. The reviewer's calculated confidence intervals (CI) for AUC0-t, AUC∞ and Cmax were within 80.0% - 125.0% for the fasted and fed BE studies. However, the application was considered incomplete (inadequate) due to the following minor deficiencies (summarized):

1. Acknowledge for future submissions that a more appropriate concentration range should be validated to avoid re-assays for above limit of quantitation (ALQ);
2. Clarify the dose used in the fed bioequivalence study; and
3. Submit raw data supporting repeat analysis of samples for high/low internal standard responses.

5. The Amendment review: DEHAVEN, WAYNE I 03/24/2011 N/A 03/24/2011 REV-BIOEQ-01(General Review) Original-1 Archive. The firm responded adequately to the aforementioned deficiencies.

In the amendment dated March 4, 2011, Tris Pharma submitted additional information with regard to the dissolution specifications. Specifically, Tris Pharma requested the DBE revisit the 1 hour specification of *NMT* (b)(4)*%*. Tris Pharma is recommending a 1 hour specification of *NMT* (b)(4)*%*. To support their claim, the firm submitted additional stability testing (i.e. dissolution testing results taken every 3 months up to 2 years) on the bio-lot #TB-023A, as well as 0 month testing on a second lot (TB-081A).

These data were overlooked in the previous DBE review mentioned above (#5). This addendum addresses the firms request to change the 1 hour specification from *NMT* (b)(4)*%* to *NMT* (b)(4)*%*.

4 SUBMISSION SUMMARY

A. Drug Product Information, PK/PD Information, and Relevant DBE History

Please see in DARRTS for ANDA #091135 DEHAVEN, WAYNE I 02/14/2011 N/A 02/14/2011 REV-BIOEQ-01(General Review) Original-1 Archive.

B. Contents of Submission

Study Types	Yes/No?	How many?
Amendment	Yes	1 (March 4, 2011)

C. Review of Submission

Addition Information Submitted by the Firm:

The following specifications were provided by OGD bioequivalence group and Tris accepted in sequence 0006. However, at this time *Tris would like to revisit the 1-hour specification upon review of additional stability data or original test batch and one additional test batch scale.*

Unlike conventional dosage form including extended release solid dosages, liquid sustained release dosage forms are complex in nature. (b) (4) These products involve use of (b) (4)

To support the revised specification request, Tris is providing all current available room temperature stability data reporting *average and range* from the original test batch.

TB-023A (Test Batch) – (b) (4) [Production size batch = (b) (4)]								
Time	**Condition**	**Dissolution (% Release)**						
		1-hr		**3-hr**		**6-hr**		**12-hr**
FDA Interim Specifications		**NMT (b) (4) %**		(b) (4)		(b) (4)		**NLT (b) (4) %**
Initial	Ambient	**30**	(b) (4)	57	(b) (4)	73	(b) (4)	86 (b) (4)
3-mo	25°C/60%RH	**33**	(b) (4)	61	(b) (4)	77	(b) (4)	88 (b) (4)
6-mo	25°C/60%RH	**34**	(b) (4)	66	(b) (4)	81	(b) (4)	91 (b) (4)
9-mo	25°C/60%RH	**33**	(b) (4)	64	(b) (4)	80	(b) (4)	91 (b) (4)
12-mo	25°C/60%RH	**34**	(b) (4)	65	(b) (4)	80	(b) (4)	90 (b) (4)

18-mo	25°C/60%RH	**34**	(b) (4)	65	(b) (4)	81	(b) (4)	90	(b) (4)
24-mo	25°C/60%RH	**35**	(b) (4)	61	(b) (4)	72	(b) (4)	83	(b) (4)

To further support the revised specification request, Tris is providing the initial release data from the additional test batch scale that was recently manufactured prior to full scale batch trials.

TB-081A (Test Batch) – (b) (4) **[Production size batch =** (b) (4) **]**							
Time	**Condition**	**Dissolution (% Release)**					
		1-hr		**3-hr**		**6-hr**	**12-hr**
FDA Interim		**NMT (b) (4) %**		(b) (4) **%**		(b) (4) **%**	**NLT (b) (4) %**
Initial	Ambient	**31**	(b) (4)	56	(b) (4)	72	(b) (4)	85	(b) (4)

Based on data provided and considering the inherent natures of the product, the following revised specifications are proposed:

Time	Current Specification	Proposed New Specification
1-hr	**NMT (b) (4) %**	**NMT (b) (4) %**
3-hr	(b) (4) %	(b) (4) %
6-hr	(b) (4) %	(b) (4) %
12-hr	NLT (b) (4) %	NLT (b) (4) %

Reviewer's comments: Tris Pharma Inc has requested that we change the 1 hour specification from NMT (b) (4) % to NMT (b) (4) % dissolved in 1 hour. In support of this request, Tris Pharma submitted stability testing results from the bio-lot (#TB-023A) as well as an additional lot (#TB-081A) (submitted in the March 4th amendment). The DBE only looks at the initial (ambient) results when setting the specification (i.e. the stability results from 3 months to 24 months are not used). Based on the submitted data, the bio-lot meets the NMT (b) (4) % in 1 hour specification at the L1 level (range = (b) (4)), while the additional lot (#TB-081A) does not meet at the L1 level (range = (b) (4)).

As stated on page 17 of the *"Guidance for Industry for Extended Release Oral Dosage Forms: Development, Evaluation, and Application of In Vitro/In Vivo Correlations"* the dissolution specification is set from the fresh biolot (not on the dissolution of the stored biolot) by adding ± 10% to the mean % dissolution. Since for the first time point (1 hr) of the test drug product the mean % dissolution of the biolot TB-023A is (b) (4) %, the DBE considers (b) (4) % to (b) (4) % or NMT (b) (4) % as the appropriate specification. Our earlier specification NMT (b) (4) % is overly strict and is not keeping with the guidance. The DBE therefore accepts the firm's request to modify the 1 hour specification of its test product from *NMT (b) (4) %* to *NMT (b) (4) %* based on the submitted dissolution data from the fresh biolot and based on Guidance for Industry recommendations. The firm will be informed that the revised specification was not based on stability data submitted in the amendment.

5 DEFICIENCY COMMENTS

None

6 RECOMMENDATIONS

1. The Division of Bioequivalence (DBE) finds the fasting bioequivalence (BE) study # S08-0445 **complete (adequate)** at this time. Tris Pharma Inc conducted the fasting BE study on its Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL (lot # TB-0023A), comparing it to the corresponding reference product, DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL (lot # 39469), manufactured by Reckitt Benckiser.

2. The DBE finds the fed BE study # S08-0445 **complete (adequate)** at this time. Tris Pharma Inc conducted the fed BE study on its Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL (lot # TB-0023A), comparing it to the corresponding reference product, DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL (lot # 39469), manufactured by Reckitt Benckiser.

3. The firm's *in vitro* dissolution testing is **complete (adequate)**. The dissolution testing should be conducted in 500 mL of 0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr sample at 37ºC + 0.5ºC using USP apparatus II (Paddle) at 50 rpm. The test product should meet the following specification(s):

1 hr: NMT (b)(4)%
3 hrs: (b)(4)%
6 hrs: (b)(4)%
12 hrs: NLT (b)(4)%.

The firm should be informed of the above recommendations.

7 COMMENTS FOR OTHER OGD DISCIPLINES

Discipline	Comment
N/A	--

BIOEQUIVALENCE COMMENTS TO BE PROVIDED TO THE APPLICANT

ANDA: 091135

APPLICANT: Tris Pharma, Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg Dextromethorphan Hydrobromide per 5 mL

The Division of Bioequivalence (DBE) has completed its review of the "additional information" section from your amendment dated March 4, 2011. In this section, you requested that the Agency change the 1 hour dissolution specification from *NMT* (b)(4)% to *NMT* (b)(4)% dissolved in 1 hour. In support of this request, you submitted stability testing results from the biobatch (#TB-023A) as well as an additional lot (#TB-081A).

Your proposed dissolution specifications based on stability data are not acceptable. Since FDA-recommended dissolution specification is determined based on the data of the freshly manufactured biobatch, which underwent acceptable bioequivalence testing, and not on the aged batches, the rationale used for justifying your proposed dissolution specifications are not acceptable.

However, the DBE has re-evaluated the previously recommended 1 hour specification of *NMT* (b)(4)% and considered it too restrictive with respect to the mean and range of the data at this time point. Therefore, the DBE has revised the recommended specification of *NMT* (b)(4)% to *NMT* (b)(4)% in 1 hour. It is important to emphasize that the revised dissolution specification is based on the original dissolution testing results submitted for the freshly manufactured biobatch, and not on stability data of aged batches.

The DBE acknowledges that you will continue to conduct dissolution testing in 500 mL of 0.1 N HCl at 37°C + 0.5°C, with addition of 400 mL of Phosphate Buffer, at 37°C + 0.5°C, after 1 hr sampling, using USP apparatus II (Paddle) at 50 rpm.

The test product should meet the following specifications:

1 hr:	**NMT** (b)(4)**%**
3 hrs:	(b)(4)%
6 hrs:	(b)(4)%
12 hrs:	NLT (b)(4)%

Sincerely yours,

AMENDMENT REVIEW

1 EXECUTIVE SUMMARY

This is a review of a bioequivalence amendment for ANDA #091135, Dextromethorphan Polistirex Extended Release Oral Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL, submitted by Tris Pharma, Inc. This is an over-the-counter (OTC) product. The firm submitted the amendment in response to a three item deficiency letter they received from the DBE on February 16, 2011. In brief, the items were: (1) acknowledge that a more appropriate concentration range should be validated to avoid re-assays for above limit of quantitation (ALQ); (2) clarify the dose used in the fed bioequivalence study; and (3) submit raw data supporting repeat analysis of samples for high/low internal standard responses.

Tris Pharma responded adequately to the aforementioned deficiencies. There are no Division of Scientific Investigations (DSI) inspections which are pending or necessary. The application is now considered **acceptable (adequate)**. The firm should be informed of this recommendation.

2 TABLE OF CONTENTS

3 BACKGROUND

There are four (4) Division of Bioequivalence (DBE) reviews for this application which are located in DARRTS. These reviews are as follows:

1. First Generic Checklist: KITCHENS, KELLY M 04/28/2009 N/A 04/28/2009 FRM-ADMIN-44(DBE Review Request) Original-1 Archive. The submission was found acceptable for filing.

2-3. Two 'dissolution only' reviews: PALAMAKULA, ANITHA 06/25/2009 N/A 06/25/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive and PALAMAKULA, ANITHA 09/03/2009 N/A 09/03/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive. Per the second 'dissolution only' review, the firm was asked to acknowledge dissolution method and specification.

4. The "full ANDA" review: DEHAVEN, WAYNE I 02/14/2011 N/A 02/14/2011 REV-BIOEQ-01(General Review) Original-1 Archive. The reviewer's calculated confidence intervals (CI) for AUC0-t, AUC∞ and Cmax were within 80.0% - 125.0% for the fasted and fed BE studies. However, the application was considered incomplete (inadequate) due to the following minor deficiencies (summarized):

1. Acknowledge for future submissions that a more appropriate concentration range should be validated to avoid re-assays for above limit of quantitation (ALQ);
2. Clarify the dose used in the fed bioequivalence study; and
3. Submit raw data supporting repeat analysis of samples for high/low internal standard responses.

The current amendment under review is in response to these deficiencies listed above. The DBE review of Tris Pharma's responses to these deficiencies can be found in Section 4C 'Review of Submission' below.

4 SUBMISSION SUMMARY

A. Drug Product Information, PK/PD Information, and Relevant DBE History

Please see in DARRTS for ANDA #091135 DEHAVEN, WAYNE I 02/14/2011 N/A 02/14/2011 REV-BIOEQ-01(General Review) Original-1 Archive.

B. Contents of Submission

Study Types	Yes/No?	How many?
Amendment	Yes	1

C. Review of Submission

Deficiency 1: Please acknowledge for future submissions that a more appropriate standard curve (SC) and quality control (QC) concentration range should be validated, which fully encompasses the expected plasma concentration ranges for all subjects. Specifically, the Agency recommends you avoid situations in which many subject samples have to be re-assayed due to initial measurements determined as being 'above the limit of quantitation (ALOQ)', which was the case for the fasting study #S08-0445.

Response 1: *It is acknowledged that for the fasting study #S08-0445 the initial sample analysis determined that 322 of 2033, 16.3%, subject samples had values above the upper limit of quantitation. For related future studies a more appropriate calibration range with associated quality controls will be validated to better accommodate higher anticipated subject sample concentrations.*

Reviewer's Comments: The firm's response is **adequate**.

Deficiency 2: It was not fully clear whether the fed study #S08-0446 was carried out using a dose of 60 mg (like the fasted study), or a dose of 30 mg as recommended in the draft individual bioequivalence recommendation guidance for the drug product. In the fed study report (page 2 of 547) it lists the dose as 30 mg; however, in the *in vivo* BE summary table, it lists 60 mg as the dose administered. Please clarify which dose was used for the fed bioequivalence (BE) study.

Response 2: *Tris reviewed the fed study report #S08-0446 and would like to clarify that the dose used was 10 mL of the 30mg/5mL strength product, which is equivalent to 60 mg dose, for the fed study.*

Reviewer's Comments: The firm's response is **adequate**.

Deficiency 3: With regard to the repeat analyses, please submit the following additional information:

a. Please submit all appropriate raw data (for fasting and fed BE studies) supporting repeat analysis of samples for high/low internal standard responses (HIS/LIS). These repeats should meet the objective criterion established in the SOP (b) (4), page 8 of 19, which says that results are flagged for repeat when there is a deviation by more than 40% of the mean IS for the entire batch run.

Response 3(a): *Tris has provided in this submission all the appropriate raw data (for fasting and fed BE studies) supporting repeat analysis of the samples for high/low internal standard responses (HIS/LIS). Refer Module 5.3.1.4 for R08-1046 and Module 5.3.1.4 for R09-1047. The following tables lists the samples provided:*

Dextromethorphan #R08-1046			
Subject	**Period**	**Time**	**Reason for Reassay**
2	1	4.5, 10, 36	LIS
2	2	5	LIS
11	1	4	LIS
15	1	4	HIS
20	1	10	LIS
22	2	6.5	LIS
26	1	4.5	LIS
28	1	2	HIS
28	2	2	HIS
32	1	5	LIS
40	2	16	LIS
48	1	16	LIS
48	2	6.5	LIS
57	1	7	LIS
58	2	24	HIS
61	1	16	LIS

Dextrorphan #R08-1046			
Subject	**Period**	**Time**	**Reason for Reassay**
9	1	48, 72	HIS
15	1	16.5, 12	LIS
48	2	6.5	LIS
61	1	8	HIS
61	2	12	HIS
62	1	2	LIS
62	2	4	LIS
63	1	0, 3, 4.5	LIS
63	2	6.5	LIS

Dextromethorphan #R08-1047			
Subject	**Period**	**Time**	**Reason for Reassay**
1	2	12	HIS
11	1	1	HIS
19	1, 2	6	LIS
22	1	0	LIS
22	2	4	HIS
25	2	16	LIS
34	4	4.5	LIS
35	2	0	LIS
37	2	72	HIS

Dextrorphan #R08-1047			
Subject	**Period**	**Time**	**Reason for Reassay**
12	1	16, 24	HIS
13	1	1, 5.5	HIS
13	2	5.5	HIS
34	1	4.5	LIS
35	2	0	LIS
37	2	4	HIS

Reviewer's Comments: The reviewer checked the internal standard (IS) data that was submitted by Tris Pharma in this amendment (Module 5.3.1.4 for R08-1046 and Module 5.3.1.4 for R09-1047). These repeats met the objective criterion established in the SOP (b) (4), page 8 of 19, which says that results are flagged for repeat when there is a deviation by more than 40% of the mean IS for the entire batch run. For instance, the subject #28 2 hour time-points for both period I and II were originally flagged for high internal standard (HIS). The reviewer determined the mean IS for this run as 18908.54. The range (b) (4) is therefore (b) (4) The subject #28 IS values were 28263.1 and 26798.0 for period I and period II, respectively, and clearly greater than 40% larger than the mean IS for this run. Similar results were validated for LIS examples. The firm's response is **adequate**.

b. Please submit the analytical procedure document defining the reason for the "sample processing error" for subject #41, hour 5.5 sample, per SOP (b) (4): Sample Reanalysis and Reporting Criteria.

Response 3(b): *The analytical procedure for Run 08104721 is provided in this submission, which documents the reason for the "sample processing error" for subject 41, hour 5.5. Refer Module 5.3.1.4 page 21 of 24 for the note describing the event.*

Reviewer's Comments: The reviewer checked the analytical procedure document for run 0810472 (page 21). The report indicated that the analyst mistakenly added excess IS to the sample. Therefore, the analyst flagged this sample for repeat. The reviewer finds the firm's response to this deficiency as **acceptable (adequate)**. There are no further questions.

5 DEFICIENCY COMMENTS

None

6 RECOMMENDATIONS

1. The Division of Bioequivalence (DBE) finds the fasting bioequivalence (BE) study # S08-0445 **complete (adequate)** at this time. Tris Pharma Inc conducted the fasting BE study on its Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL (lot # TB-0023A), comparing it to the corresponding reference product, DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL (lot # 39469), manufactured by Reckitt Benckiser.

2. The DBE finds the fed BE study # S08-0445 **complete (adequate)** at this time. Tris Pharma Inc conducted the fed BE study on its Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL (lot # TB-0023A), comparing it to the corresponding reference product, DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL (lot # 39469), manufactured by Reckitt Benckiser.

3. The firm's *in vitro* dissolution testing is **acceptable (adequate)**. The dissolution testing should be conducted in 500 mL of 0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr sample at 37ºC + 0.5ºC using USP apparatus II (Paddle) at 50 rpm. The test product should meet the following specification(s):

1 hr: NMT (b)(4)%
3 hrs: (b)(4)%
6 hrs: (b)(4)%
12 hrs: NLT (b)(4)%.

The firm should be informed of the above recommendations.

7 COMMENTS FOR OTHER OGD DISCIPLINES

BIOEQUIVALENCE COMMENTS TO BE PROVIDED TO THE APPLICANT

ANDA: 091135

APPLICANT: Tris Pharma, Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg Dextromethorphan Hydrobromide per 5 mL

The Division of Bioequivalence (DBE) has completed its review of your amendment submission dated March 4, 2011, and there are no further questions at this time.

We acknowledge you will conduct dissolution testing for your test product as follows:

The dissolution testing should be conducted in 500 mL of 0.1 N HCl at 37°C + 0.5°C, with addition of 400 mL of Phosphate Buffer, at 37°C + 0.5°C, after 1 hr sampling, using USP apparatus II (Paddle) at 50 rpm. The test product should meet the following specifications:

1 hr: NMT (b) (4) %
3 hrs: (b) (4) %
6 hrs: (b) (4) %
12 hrs: NLT (b) (4) %

Please note that the bioequivalence comments provided in this communication are preliminary. These comments are subject to revision after review of the entire application, upon consideration of the chemistry, manufacturing and controls, microbiology, labeling, or other scientific or regulatory issues. Please be advised that these reviews may result in the need for additional bioequivalence information and/or studies, or may result in a conclusion that the proposed formulation is not approvable.

Sincerely yours,

{See appended electronic signature page}

Dale P. Conner, Pharm.D.
Director, Division of Bioequivalence I
Office of Generic Drugs

1 EXECUTIVE SUMMARY

This application contains the results of fasting and fed bioequivalence (BE) studies comparing a test product, Tris Pharma's Dextromethorphan Polistirex Extended Release (ER) Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL, to the corresponding reference product, DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL, manufactured by Reckitt Benckiser. According to the Orange Book (OB), this is an over-the-counter (OTC) product[1].

Each of the BE studies was designed as a single-dose, two-way crossover study in healthy subjects. The fasted study was carried out on two groups, while the fed study was conducted on a single group. The TRT*GRP parameter for the fasted study was not significant for AUC0-t, AUC∞ or Cmax, and was therefore dropped from the final analysis. The reviewer's calculated confidence intervals (CI) for AUC_{0-t}, AUC_{∞} and Cmax were within 80.0% - 125.0% for the fasted and fed BE studies. However, the application is **incomplete (inadequate)** at this time due to deficiencies listed in Section 3.10 of this review. The reviewer's calculated results of the BE studies are summarized in the tables below.

FASTED – Dextromethorphan (TRT*GRP dropped):

Dextromethorphan Polistirex 30 mg / 5 mL (2 x 30 mg / 5 mL) Fasted Bioequivalence Study (S08-0445) N=53					
	Least Squares Geometric Mean		Ratio	90% Confidence Intervals	
Parameter	Test	Reference	(T/R)	Lower	Upper
AUC0-t (hr *pg/ml)	47984.97	46415.72	1.03	97.43	109.69
AUC∞ (hr *pg/ml)	33050.42	31466.96	1.05	98.28	112.24
Cmax (pg/ml)	2904.86	2929.23	0.99	93.33	105.38

FED - Dextromethorphan:

Dextromethorphan Polistirex 30 mg / 5 mL (1 x 30 mg / 5 mL) Fed Bioequivalence Study (S08-0446) N=37					
	Least Squares Geometric Mean		Ratio	90% Confidence Intervals	
Parameter	Test	Reference	(T/R)	Lower	Upper
AUC0-t (hr *pg/ml)	33667.37	37341.94	0.90	82.15	98.95
AUC∞ (hr *pg/ml)	32574.28	36001.18	0.90	82.21	99.58
Cmax (pg/ml)	2018.75	2259.84	0.89	81.42	98.01

[1] http://www.accessdata.fda.gov/scripts/cder/ob/docs/obdetail.cfm?Appl_No=018658&TABLE1=OB_OTC

In the BE studies, the pharmacokinetic (PK) parameters of the test and reference for the active metabolite, dextrorphan, were comparable. Therefore the metabolite data are supportive.

There are two (2) 'dissolution only' reviews which can be found in DARRTS [please see for ANDA # 091135 PALAMAKULA, ANITHA 06/25/2009 N/A 06/25/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive *and* PALAMAKULA, ANITHA 09/03/2009 N/A 09/03/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive]. The firm has conducted acceptable comparative dissolution testing using an 'in-house' dissolution method. On September 25, 2009, the firm has acknowledged the following dissolution method and specifications: 500 mL of 0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr at 37°C, using USP Apparatus II (Paddle) at 50 rpm. Specifications = 1 hr: NMT (b) (4)%, 3 hrs: (b) (4)%, 6 hrs: (b) (4)% and 12 hrs: NLT (b) (4)%.

No Division of Scientific Investigations (DSI) inspection is pending or necessary. Clinical site: last routine inspection was completed on 5/5/2010, NAI, base on NDA 022439. Analytical site: last routine inspection completed on (b) (4), based on (b) (4) After reviewing the (b) (4) results of the analytical site inspection for NDA 022503 [see in DARRTS for NDA # 022503 RIVERA-LOPEZ, CAROL M (b) (4) N/A (b) (4) CONSULT REV-DSI-05(Bioequivalence Establishment Inspection Report Review) Original-1 (Type 3- New Dosage Form) Archive], the reviewer concludes that the (b) (4) form 483 deficiencies do not significantly affect these current BE studies under review here.[2]

The application is **incomplete (inadequate)** at this time.

(b) (4)

2 TABLE OF CONTENTS

3 SUBMISSION SUMMARY

3.1 Drug Product Information

Test Product	Dextromethorphan Polistirex ER Oral Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL
Reference Product[3]	DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL**
RLD Manufacturer	Reckitt Benckiser
NDA No.	018658
RLD Approval Date	October 8, 1982
Indication[2]	DELSYM® is an OTC product which according to its label temporarily relieves (i) cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants, and (ii) the impulse to cough to help you get to sleep.

** Please note that the Orange Book lists DELSYM® as an over-the counter (OTC) drug product.

3.2 PK/PD Information[4,5]

Bioavailability	Dextromethorphan is well absorbed from the gastrointestinal tract.
Food Effect	May be taken with or without food.
Tmax	Approximately 5-6 hours
Metabolism	Dextromethorphan undergoes rapid and extensive hepatic metabolism to demethylated metabolites including the active metabolite, dextrorphan. Dextromethorphan is primarily metabolized by cytochrome P450 2D6 isoenzymes. The rate of metabolism varies between individuals according to phenotype (extensive or poor metabolizers).
Excretion	Excretion is primarily by renal elimination of metabolites; some drug is excreted unchanged.
Half-life	The plasma half-life is normally about 11 hours, and antitussive activity can last for 5—6 hours.
Drug Specific Issues (if any)	NOTE: On May 20, 2005, the FDA made a public announcement regarding dextromethorphan (DXM) and new trends in the abuse of this drug. The ingestion of pure dextromethorphan in powdered form and in excessive dose can cause death as well as other serious adverse events such as brain damage, seizure, loss of consciousness, and irregular heart beat. Although the reported abuse of dextromethorphan is not new, dextromethorphan is increasingly offered for sale in pure powdered form from questionable sources (e.g., unsanctioned pharmacy websites) and street dealers, and health care professionals should be alert to these new trends. When ingested at recommended dosage levels for intended purposes, dextromethorphan is generally regarded as a safe and effective cough suppressant.

[5] http://www.clinicalpharmacology-ip.com/Forms/search.aspx?s=delsym

	NOTE: In January 2007, the CDC warned caregivers and healthcare providers of the risk for serious injury or fatal overdose from the administration of cough and cold products to children and infants less than 2 years of age.[33534] This warning followed an investigation of the deaths of three (3) infants less than 6 months of age that were attributed to the inadvertent inappropriate use of these products. The symptoms preceding these deaths have not been clearly defined, and there is a lack of conclusive data describing the exact cause of death. The report estimated that 1519 children less than 2 years of age were treated in emergency departments during 2004—2005 for adverse events related to cough and cold medications. In October 2007, the FDA Nonprescription Drug Advisory Committee and the Pediatric Advisory Committee recommended that nonprescription cough and cold products containing pseudoephedrine, dextromethorphan, chlorpheniramine, diphenhydramine, brompheniramine, phenylephrine, clemastine, or guaifenesin not be used in children less than 6 years of age. In January 2008, the FDA issued a Public Health Advisory recommending that OTC cough and cold products not be used in infants and children less than 2 years. An official ruling regarding the use of these products in children greater than 2 years has not yet been announced. The FDA recommends that if parents and caregivers use cough and cold products in children greater than 2 years, labels should be read carefully, caution should be used when administering multiple products, and only measuring devices specifically designed for use with medications should be used. While some combination cough/cold products containing these ingredients are available by prescription only and are not necessarily under scrutiny by the FDA, clinicians should thoroughly assess each patient's use of similar products, both prescription and nonprescription, to avoid duplication of therapy and the potential for inadvertent overdose.

3.3 OGD Recommendations for Drug Product

Number of studies recommended:	2, fasting and fed

1.	**Type of study:**	Fasting
	Design:	Single-dose, two-treatment, two-period crossover *in-vivo*
	Strength:	30 mg / 5 mL**
	Subjects:	Normal healthy males and females, general population
	Additional Comments:	

2.	**Type of study:**	Fed
	Design:	Single-dose, two-treatment, two-period crossover *in-vivo*
	Strength:	30 mg / 5 mL**
	Subjects:	Normal healthy males and females, general population
	Additional Comments:	

** Please note that the fasted study dosed the subjects at 60 mg (i.e. 10 mL) for the fasted BE study, and apparently 30 mg (i.e. 5 mL) for the fed BE study. However, because there were several places in which it was not clear what the dose was in the fed study, the firm will be asked to clarify.

3.5 Pre-Study Bioanalytical Method Validation

Dextromethorphan:

Information Requested	Data
Bioanalytical method validation report location	Module 5.3.1.4
Analyte	Dextromethorphan
Internal standard (IS)	(b) (4)
Method description	Liquid/liquid extraction
Limit of quantitation	10.0 pg/mL
Average recovery of drug (%)	58.27%
Average recovery of IS (%)	47.06%
Standard curve concentrations (pg/mL)	10.0, 20.0, 40.0, 100, 200, 500, 1000, 5000, 8500, 10000
QC concentrations (pg/mL)	10.0, 30.0, 750, 4500, 8000
QC Intraday precision range (%)	1.11% – 12.90%
QC Intraday accuracy range (%)	93.85% – 105.83%
QC Interday precision range (%)	3.09% – 8.21%
QC Interday accuracy range (%)	96.42% –101.81%
Bench-top stability (hrs)	23:41 hours–minutes
Stock stability (hrs)	1438:58 hours–minutes @ 4ºC 1438:58 hours–minutes @ room temperature
Processed stability (hrs)	95:44 hours–minutes @ 4ºC
Freeze-thaw stability (cycles)	6 cycles
Long-term storage stability (days)	292 days @ -70ºC
Dilution integrity	50000 pg/mL and 8000 pg/mL diluted 1:9
Selectivity	No interfering peaks noted in blank plasma samples in fourteen out of twenty-four lots

Dextrorphan:

Information Requested	Data
Bioanalytical method validation report location	Module 5.3.1.4
Analyte	Dextrorphan
Internal standard (IS)	(b) (4)
Method description	Liquid/liquid extraction
Limit of quantitation	10.0 pg/mL
Average recovery of drug (%)	57.80%
Average recovery of IS (%)	45.88%
Standard curve concentrations (pg/mL)	10.0, 20.0, 40.0, 100, 200, 500, 1000, 5000, 8500, 10000
QC concentrations (pg/mL)	10.0, 30.0, 750, 4500, 8000
QC Intraday precision range (%)	0.92% – 7.07%
QC Intraday accuracy range (%)	85.67% – 107.05%
QC Interday precision range (%)	2.48% – 11.89%
QC Interday accuracy range (%)	97.22% – 101.23%
Bench-top stability (hrs)	23:41 hours–minutes
Stock stability (days)	1439:14 hours–minutes @ 4ºC

	1439:14 hours–minutes @ room temperature
Processed stability (hrs)	95:44 hours–minutes @ 4°C
Freeze-thaw stability (cycles)	6 cycles
Long-term storage stability (days)	292 days @ -70°C
Dilution integrity	50000 pg/mL and 8000 pg/mL diluted 1:9
Selectivity	No interfering peaks noted in blank plasma samples in twenty-one out of twenty-four lots

SOPs submitted	(b) (4) Assay Validation in Biological Fluids Sample Analysis (Chromatographic) Sample re-analysis and reporting Criteria Reproducibility of Incurred Samples
Bioanalytical method is acceptable	**ACCEPTABLE (ADEQUATE)**

Comments on the Pre-Study Method Validation:

The long term storage stability (LTSS) data supporting the storage of dextromethorphan and dextrorphan for 292 days @ -70°C exceeds the storage duration for both the fasted and fed BE studies (60 and 47 days, respectively).

K2-EDTA was used as anticoagulant in both the pre-study method validation, as well as during the fasted and fed BE studies.

The overall % recovered for dextromethorphan and dextrorphan were only 58.3% and 57.8%, respectively (dextromethorphan = 50.84%=LQC; 58.51%=MQC, 65.47%=HQC; dextrorphan = 48.53%=LQC; 60.66%=MQC, 64.22%=HQC). The reviewer notes that the area response at the LLOQ quality control concentration for both dextromethorphan and dextrorphan was precise, accurate, and reproducible. In addition, the low recovery did not influence the bioanalytical results of the 'full' BE studies. According to Guidance, "recovery need not be 100%, but the extent of recovery should be consistent, precise and reproducible." The low recovery of dextromethorphan and dextrorphan is acceptable.

The reviewer notes that there were a lot of subject samples in the 'full BE' studies which required repeat analysis due to initial measurements above the limit of quantitation (ALQ). The validation report supports measurement up to 12000 pg/mL diluted at 1:4. This apparently did not exceed all of the initial measurements made during the analysis of the fasting and fed BE studies. Therefore, there is a partial validation report supporting the measurement up to 50000 pg/mL diluted at 1:9. The reviewer accepts the partial validation. Nonetheless, the reviewer will ask the firm to acknowledge that for future submissions, a more appropriate standard curve and QC range should be validated, which fully encompasses the expected plasma concentration ranges for all subjects. In addition, specifically with regard to the fasting study, the firm should acknowledge that per the guidance, it is recommended that the study be carried out on subjects dosed with 30 mg, and not 60 mg.

The pre-study method validation is **acceptable (adequate)** at this time.

3.6 In Vivo Studies

Table 1. Summary of all in vivo Bioequivalence Studies

Dextromethorphan:

Study Ref. No.	Study Objective	Study Design	Treatments (Dose, Dosage Form, Route) [Product ID]	Subjects[1] (No. (M/F) Type Age: mean (Range)	Mean Parameters (+/-SD)						Study Report Location
					Cmax (units/mL)	Tmax (hr)	AUC0-t (units)	AUC∞ (units)	T½ (hr)	Kel (hr-1)	
S08-0445	Single Dose, Two-Way Crossover Fasted BE Study of Dextromethorphan Polistirex ER Suspension 30 mg/5 mL in Healthy Volunteers	Randomized single-dose crossover	Dextromethorphan Polistirex ER Oral Suspension 60 mg Dose Oral [TB-023A]	53 (28/25) Healthy volunteers 29.4 yr (18 - 55 yr)	8910.05 (140.58)	6.00 (4.50 - 12.00)	267265.19 (233.45)	119511.47 (196.71)	12.45 (41.28)	0.0636 (33.55)	Module 5.3.1.2

			Delsym® Suspension 60 mg Dose Oral [39469]		4219.79 (148.43)	6.00 (4.00 - 12.00)	106974.22 (282.67)	61904.16 (135.32)	9.94 (29.69)	0.0744 (23.10)	

Dextrorphan:

Study Ref. No.	Study Objective	Study Design	Treatments (Dose, Dosage Form, Route) [Product ID]	Subjects[1] (No. (M/F) Type Age: mean (Range)	Mean Parameters (+/-SD)						Study Report Location
					Cmax (units/mL)	Tmax (hr)	AUC0-t (units)	AUC∞ (units)	T½ (hr)	Kel (hr-1)	
S08-0445	Single Dose, Two-Way Crossover Fasted BE Study of Dextromethorphan Polistirex ER Suspension 30 mg/5 mL in Healthy Volunteers	Randomized single-dose crossover	Dextromethorphan Polistirex ER Oral Suspension 60 mg Dose Oral [TB-023A]	53 (28/25) Healthy volunteers 29.4 yr (18 - 55 yr)	3691.23 (49.25)	5.00 (2.00 - 8.00)	40628.40 (43.27)	43682.40 (40.42)	11.80 (61.57)	0.0771 (45.25)	Module 5.3.1.2
			Delsym® Suspension 60 mg Dose Oral [39469]		4018.34 (58.31)	5.00 (2.00 - 7.00)	40151.39 (45.61)	43511.47 (41.09)	10.24 (57.72)	0.0838 (39.58)	
S08-0446	Single Dose, Two-Way Crossover Fed BE Study of Dextromethorphan Polistirex ER Suspension 30 mg/5 mL in Healthy Volunteers	Randomized single-dose crossover	Dextromethorphan Polistirex ER Oral Suspension 60 mg Dose Oral [TB-023A]	37 (20/17) Healthy volunteers 28.6 yr (18 - 50 yr)	4071.22 (42.02)	5.00 (2.00 - 6.50)	45461.94 (47.65)	47087.48 (45.29)	8.99 (43.96)	0.0893 (33.89)	Module 5.3.1.2
			Delsym® Suspension 60 mg Dose Oral [39469]		4572.57 (52.47)	5.00 (2.00 - 12.00)	49916.68 (44.94)	51512.96 (42.17)	8.01 (41.72)	0.0989 (33.52)	

The reviewer highlighted the 60 mg dose for the fed study because, according to the clinical report, the actual dose was 30 mg for the fed study. In contrast, the fasting study was carried out on subjects dosed with 60 mg. The firm will be asked to clarify.

Table 2. Statistical Summary of the Comparative Bioavailability Data Calculated by the Reviewer

FASTED – Dextromethorphan (TRT*GRP dropped):

Dextromethorphan Polistirex 30 mg / 5 mL (2 x 30 mg / 5 mL) Fasted Bioequivalence Study (S08-0445) N=53					
	Least Squares Geometric Mean		Ratio	90% Confidence Intervals	
Parameter	Test	Reference	(T/R)	Lower	Upper
AUC0-t (hr *pg/ml)	47984.97	46415.72	1.03	97.43	109.69
AUC∞ (hr *pg/ml)	33050.42	31466.96	1.05	98.28	112.24
Cmax (pg/ml)	2904.86	2929.23	0.99	93.33	105.38

FED - Dextromethorphan:

Dextromethorphan Polistirex 30 mg / 5 mL (1 x 30 mg / 5 mL) Fed Bioequivalence Study (S08-0446) N=37					
	Least Squares Geometric Mean		Ratio	90% Confidence Intervals	
Parameter	Test	Reference	(T/R)	Lower	Upper
AUC0-t (hr *pg/ml)	33667.37	37341.94	0.90	82.15	98.95
AUC∞ (hr *pg/ml)	32574.28	36001.18	0.90	82.21	99.58
Cmax (pg/ml)	2018.75	2259.84	0.89	81.42	98.01

In the BE studies, the pharmacokinetic (PK) parameters of the test and reference for the active metabolite, dextrorphan, were comparable. Therefore the metabolite data are supportive. The reviewer's calculated results for dextrorphan in the fasted and fed BE studies are summarized in the tables below:

FASTED (TRT*GRP dropped) - Dextrorphan:

Dextromethorphan Polistirex 30 mg / 5 mL (2 x 30 mg / 5 mL) Fasted Bioequivalence Study (S08-0445) N=53					
	Least Squares Geometric Mean		Ratio	90% Confidence Intervals	
Parameter	Test	Reference	(T/R)	Lower	Upper
AUC0-t (hr *pg/ml)	35259.36	34403.77	1.02	98.07	107.10
AUC∞ (hr *pg/ml)	39347.92	38498.42	1.02	97.31	107.35
Cmax (pg/ml)	2947.66	3084.91	0.96	90.34	101.07

FED - Dextrorphan:

Dextromethorphan Polistirex 30 mg / 5 mL (1 x 30 mg / 5 mL) Fed Bioequivalence Study (S08-0446) N=37					
	Least Squares Geometric Mean		Ratio	90% Confidence Intervals	
Parameter	Test	Reference	(T/R)	Lower	Upper
AUC0-t (hr *pg/ml)	40656.88	44956.62	0.90	86.39	94.67
AUC∞ (hr *pg/ml)	42917.70	47382.83	0.91	86.44	94.91
Cmax (pg/ml)	3596.29	3903.02	0.92	85.29	99.55

Did use of recalculated plasma concentration data change study outcome?

No. The reviewer agrees with the firm that there is no PK re-assay in any of the studies.

Comments from the Reviewer:

A spot check of the analytical repeats above suggests that the firm did follow its own SOP ((b) (4) : Sample Reanalysis and Reporting Criteria), which was established *a priori*.

The reviewer notes that there were a lot of subject samples re-analyzed because of samples above the limit of quantitation (ALQ). As mentioned in the pre-study method validation section of this review, the firm will be asked to acknowledge that for future submissions, a more appropriate standard curve and QC range should be validated, which fully encompasses the expected plasma concentration ranges for all subjects.

With regard to the repeat analyses, the firm will be asked to submit the following additional information:

1. The firm should submit all appropriate data (for fasting and fed BE studies) supporting repeat analysis of samples for high/low internal standard responses (HIS/LIS). These repeats should meet the objective criterion established in the SOP (b) (4) , page 8 of 19, which says that results are flagged

for repeat when there is a deviation by more than 40% of the mean IS for the entire batch run.

2. Given that this subject sample is at or near Tmax (fed study – dextromethorphan, subject 41, hour 5.5), the firm should submit the analytical procedure sheet defining the reason for the sample processing error, per SOP (b) (4): Sample Reanalysis and Reporting Criteria.

The re-analysis of study samples is incomplete (inadequate) at this time.

3.7 Formulation

Location in appendix	See section 4.2
If a tablet, is the RLD scored?	N/A
If a tablet, is the test product biobatch scored	N/A
Is the formulation acceptable?	**FORMULATION ACCEPTABLE**
If not acceptable, why?	N/A

3.8 In Vitro Dissolution

Location of DBE Dissolution Review	There are 2 'dissolution only' reviews which can be found in DARRTS: 1) PALAMAKULA, ANITHA 06/25/2009 N/A 06/25/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive 2) PALAMAKULA, ANITHA 09/03/2009 N/A 09/03/2009 REV-BIOEQ-02(Dissolution Review) Original-1 Archive
Source of Method (USP, FDA or Firm)	Firm Proposed Method[7]
Medium	0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr.
Volume (mL)	500 mL
USP Apparatus type	USP II (Paddle)
Rotation (rpm)	50 rpm
DBE-recommended specifications	1 hr: NMT (b) (4)% 3 hrs: (b) (4)% 6 hrs: (b) (4)% 12 hrs: NLT (b) (4)%.

[7] The firm submitted comparative dissolution testing data for both the firm's proposed method and the FDA-recommended method. The sampling for the dissolution testing conducted using the FDA-recommended method was not taken to the time point of complete dissolution: At 180 minutes, less than (b) (4)% LC of both the test and RLD products was dissolved. The firm's proposed method is accepted.

If a modified-release tablet, was testing done on ½ tablets?	N/A
F2 metric calculated?	No
If no, reason why F2 not calculated	single strength
Is method acceptable?	**METHOD ACCEPTABLE**
If not then why?	N/A

The firm acknowledged the dissolution method and specifications in an amendment dated September 25, 2009. On October 9, 2009, the firm submitted an additional amendment updating the new product dissolution specification, release specification and stability specification, as well as submitted additional stability data.

F2 metric, biostudy strengths compared to other strength(s)			
Biostudy Strength	**Other Strength**	**F2 metric for test**	**F2 metric for RLD**
N/A	N/A	N/A	N/A

3.9 Waiver Request(s)

Strengths for which waivers are requested	N/A
Proportional to strength tested in vivo?	N/A
Is dissolution acceptable?	N/A
Waivers granted?	**N/A**
If not then why?	N/A

3.10 Deficiency Comments

1. The firm should acknowledge that for future submissions, a more appropriate standard curve (SC) and quality control (QC) concentration range should be validated, which fully encompasses the expected plasma concentration ranges for all subjects. Specifically, the Agency recommends the firm avoid situations in which many subject samples have to be re-assayed due to initial measurements determined as being 'above the limit of quantitation (ALOQ)'.

2. In addition, it was not fully clear whether the fed study # S08-0446 was carried out on subjects dosed at 60 mg (like the fasted study), or dosed at the recommended 30 mg. For instance, in the fed study report (page 2 of 547) it lists the dose as 30 mg; however, in the *in vivo* BE summary table, it lists 60 mg as the dose administered. Based on the plasma profiles, the Agency is assuming the dose administered in the fed study was 30 mg. The firm will be asked to clarify if this assumption is correct or not.

3. With regard to the repeat analyses, the firm should submit the following additional information:

- **a.** The firm should submit all appropriate data (for fasting and fed BE studies) supporting repeat analysis of samples for high/low internal standard responses (HIS/LIS). These repeats should meet the objective criterion established in the SOP (b) (4), page 8 of 19, which says that results are flagged for repeat when there is a deviation by more than 40% of the mean IS for the entire batch run.

- **b.** The firm should also submit the analytical procedure sheet defining the reason for the sample processing error, per SOP (b) (4): Sample Reanalysis and Reporting Criteria.

3.11 Recommendations

1. The Division of Bioequivalence finds the fasting BE study # S08-0445 **incomplete (inadequate)** due to the deficiencies listed above. Tris Pharma Inc conducted the fasting BE study on its Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL (lot # TB-0023A), comparing it to the corresponding reference product, DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL (lot # 39469), manufactured by Reckitt Benckiser.

2. The Division of Bioequivalence finds the fed BE study # S08-0445 **incomplete (inadequate)** due to the deficiencies listed above. Tris Pharma Inc conducted the fed BE study on its Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL (lot # TB-0023A), comparing it to the corresponding reference product, DELSYM® ER Suspension, EQ 30 mg dextromethorphan hydrobromide per 5 mL (lot # 39469), manufactured by Reckitt Benckiser.

3. The firm's *in vitro* dissolution testing is **acceptable (adequate)**. The dissolution testing should be conducted in 500 mL of 0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr sample at 37ºC $\pm$ 0.5ºC using USP apparatus II (Paddle) at 50 rpm. The test product should meet the following specification(s):

   1 hr: NMT (b) (4)%
   3 hrs: (b) (4)%
   6 hrs: (b) (4)%
   12 hrs: NLT (b) (4)%.

The firm should be informed of the above recommendations.

4 APPENDIX

4.1 Individual Study Reviews

4.1.1 Single-dose Fasting Bioequivalence Study

4.1.1.1 Study Design

Table 4 Study Information

Study Number	S08-0445
Study Title	A Relative Bioavailability Study of 30 mg / 5 mL Dextromethorphan Polistirex (Equivalent to 30 mg Dextromethorphan HBr) ER Oral Suspension Versus 30 mg / 5 mL Delsym® ER Oral Suspension Under Fasted Conditions
Clinical Site (Name, Address, Phone #)	Cetero Research 400 Fountain Lakes Blvd. St. Charles, MO 63301 (314) 419-6592
Principal Investigator	Jeffrey P. Ciaramita, M.D.
Dosing Dates	Group 1, Period I: 18 October 2008
	Group 1, Period II: 01 November 2008
	Group 2, Period I: 20 November 2008
	Group 2, Period II: 04 December 2008
Analytical Site (Name, Address, Phone #)	(b) (4)
Analysis Dates	November 26, 2008 – December 17, 2008
Analytical Director	(b) (6)
Storage Period of Biostudy Samples (no. of days from the first day of sample collection to the last day of sample analysis)	60 days

Reviewer's comments: Please note that the data analysis began prior to the completion of Group 2 clinical portion of the study, and this raised a concern that the data of one group may also be statistically analyzed prior to the start of the second group and introduced bias to the study data. However, based on the raw data submitted, the reviewer determined that only batches for subject #s 1-21 were analyzed prior to December 4, 2008. All subjects after #21 from Group I were analyzed later. Therefore, the firm could not carry out statistical analysis prior to completion of Group II, and the reviewer finds this acceptable (adequate).

Table 5. Product information

Product	Test	Reference
Treatment ID	A	B
Product Name	Dextromethorphan Polistirex ER Oral Suspension	Delsym® Oral Suspension
Manufacturer	Tris Pharma, Inc.	Adams Respiratory Therapeutics

Batch/Lot No.	TB-0023A	39469
Manufacture Date	09/03/08	N/A
Expiration Date	N/A	Dec 2008
Strength	30 mg per 5 mL (equivalent to 30 mg dextromethorphan HBr)	30 mg per 5 mL (equivalent to 30 mg dextromethorphan HBr)
Dosage Form	Oral Suspension	Oral Suspension
Bio-batch Size	(b) (4)	N/A
Production Batch Size		N/A
Potency	100.8%, 102.2%	96.4%, 99.4%
Content Uniformity (mean, %CV)	N/A	N/A
Deliverable Volume (mean, range)	100.8%, 100.0 - 101.7%	N/A
Dose Administered	10 mL, 60 mg	10 mL, 60 mg
Route of Administration	Oral	Oral

The subjects were dosed at 60 mg (i.e. 10 mL)

Table 6. Study Design, Single-Dose Fasting Bioequivalence Study

Number of Subjects	61 enrolled / 54 completed / 54 analyzed / 53 used in Final Report
No. of Sequences	2
No. of Periods	2
No. of Treatments	2
No. of Groups	2: Period I dosing for Group 1 = October 18, 2008 Period I dosing for Group 2 = November 20, 2008 According to the firm, "Due to an unexpected number of subjects that were either dropped or did not report for Period I check-in on October 17, 2008, an additional 11 alternates were enrolled in a second group (Group 2) so that the total number of healthy adult subjects (male and female) completing the S08-0445 study was 54 as stated in the protocol. Upon approval of the amendment to the protocol on November 10, 2008, analyses of the samples and data from Group 1 commenced; data from Group 2 was included with the analyses of the samples and data of Group 1 in the report." The reviewer verified that the firm specified in the protocol that 54 healthy male and female subjects would be enrolled.
Washout Period	14 days
Randomization Scheme	**GROUP 1** AB: 1, 2, 6, 8, 10, 11, 14, 17, 18, 19, 20, 21, 27, 28, 29, 31, 33, 34, 37, 38, 39, 43, 46, 48, 49, 51, 54 BA: 3, 4, 5, 7, 9, 12, 13, 15, 16, 22, 23, 24, 25, 26, 30, 32, 35, 36, 40, 41, 42, 44, 45, 47, 50, 52, 53 **GROUP 2**

	AB: 56, 57, 59, 61, 65 BA: 55, 58, 60, 62, 63, 64 Highlighted yellow subjects did not complete the study, highlighted pink subject was dropped from the final analysis due to pre-dose concentration greater than 5% respective Cmax.
Blood Sampling Times	During each study period, 19 blood samples (6 mL each) were collected from each subject within 90 minutes prior to administration of study product to the first study participant (Hour 0 only) and post-dose Hours 1, 2, 3, 4, 4.5, 5, 5.5, 6, 6.5, 7, 8, 10, 12, 16, 24, 36, 48 and 72.
Blood Volume Collected/Sample	During each study period, 19 blood samples were collected (6 mL each) from each subject by direct venipuncture using pre-labeled vacutainers containing K2-EDTA as the anticoagulant. Approximately 228 mL of blood was collected from each subject as pharmacokinetic samples over the course of the study. The actual times at which blood samples were collected are recorded and presented with each subject's Case Report Form.
Blood Sample Processing/Storage	Samples were cooled by an ice bath or Kryorack® until processed, centrifuged at approximately 3000 RPM at 4°C for 10 minutes and then placed into an ice bath or Kryorack®. Plasma was evenly divided and transferred into duplicate 10 mL polypropylene tubes and maintained in the ice bath or Kryorack®. Samples were then stored and frozen at approximately -70°C (±20°C) until shipment to the bioanalytical laboratory. The time between sample collection and placement in freezer did not exceed 1.5 hours. The frozen samples were shipped under dry ice to (b) (4) for assay.
IRB Approval	Yes (Approval dates – October 6 and 13, 2008 and November 10, 2008
Informed Consent	Yes
Length of Fasting	Subjects fasted for 10 hours prior to study drug dosing each period and for four (4) hours after dosing. No fluids were allowed from one (1) hour prior to dosing, until one (1) hour after the 0-hour dosing, except that included with the dose.
Length of Confinement	Subjects meeting all entrance criteria were admitted and sequestered at the clinical facility for at least 10 hours pre-dose until 24 hours post-dose. Subjects returned to the clinic for blood collections at post-dose Hours 36, 48, and 72.
Safety Monitoring	The following assessments were completed within 28 days of Period I dosing: medical and medication history, physical examination, sitting blood pressure and heart rate, oral temperature, ECG, clinical laboratory evaluations, screens for HIV, Hepatitis B, Hepatitis C, drugs of abuse, and serum pregnancy test. All subjects gave written informed consent and were allowed to ask, and have answered, questions concerning the conduct of the study prior to enrollment in the study. Demographic data (including height, weight, age, gender, race, ethnicity and BMI) was collected for each subject.

	At study check-in, the subjects were briefly evaluated to assess if they continued to meet the study inclusion/exclusion criteria. In addition, a urine specimen was collected for drugs of abuse testing and a urine pregnancy test was performed. Blood pressure and pulse measurements were obtained within 90 minutes prior to administration of study product to the first study participant (Hour 0 only), within ±30 minutes of post-dose Hours 5, 12, 24, and at the discretion of the clinical staff. Study exit / early termination procedures were completed with the last blood sample collection. Procedures included general observations, blood pressure, heart rate, selected clinical laboratory measurements, and pregnancy screen.

Comments on Study Design:

The study design is **acceptable (adequate)**. Two groups were used in the fasting study, while a single group was used in the fed study. The firm added the second group in the fasted study after the initiation of period I dosing for group 1, and group 2 subjects were not randomized with group 1 subjects. Please note that the data analysis for Group 1 began prior to the completion of Group 2 clinical portion of the study, and this is generally considered unacceptable. However, based on the raw data submitted, the reviewer determined that only batches for subject #s 1-21 were analyzed prior to December 4, 2008. All subjects after #21 from Group I were analyzed later. Therefore, the firm could not carry out statistical analysis prior to completion of Group II, and the reviewer finds this acceptable.

4.1.1.2 Clinical Results

Inter day Accuracy (%Bias)	9.3	3.5	0.2	-4.7

Comments on Study Assay Validation:

Acceptable.

Any interfering peaks in chromatograms?	NO
Were 20% of chromatograms included?	YES
Were chromatograms serially or randomly selected?	Serially after subject 28 (28-42, i.e. batch run 10-13)

Comments on Chromatograms:

Acceptable.

Table 12. SOP's Dealing with Bioanalytical Repeats of Study Samples

SOP No.	Effective Date of SOP	SOP Title
	(b) (4)	Sample Reanalysis and Reporting Criteria

Table 13. Additional Comments on Repeat Assays

Were all SOPs followed?	See comments below
Did recalculation of PK parameters change the study outcome?	See comments below
Does the reviewer agree with the outcome of the repeat assays?	See comments below
If no, reason for disagreement	N/A

Summary/Conclusions, Study Assays:

The reviewer is requesting from the firm more data to validate that they did follow their SOP with regard to re-analysis of subject samples due to high/low internal standard responses.

4.1.1.4 Pharmacokinetic Results

Table 14. Arithmetic Mean Pharmacokinetic Parameters

Mean plasma concentrations are presented in Table 18 and Figure 1

Test	50	0.97	0.69	1.00
Reference	48	0.98	0.67	1.00

Comments on Pharmacokinetic and Statistical Analysis:

The fasted BE study was conducted using two groups. The TRT*GRP parameter was not significant for AUC0-t, AUC∞ or Cmax, and was dropped from the final analysis.

Data from Reviewer's calculations were generated using SAS code "CALCKE".

While the reviewer's arithmetic mean PK values were nearly identical to the firm's calculated values (compare Table 1 versus Table 14), the geometric means from log-transformed data were different (compare Table 15 versus Table 16). However, the plasma concentration data were the same between what the reviewer used and what the firm used to calculate PK parameters (spot-checked). In addition, the Firm/Reviewer ratios were all approximately 1.0 (see pages 119-123). The firm will be asked to clarify.

Blood sampling deviations during the fasted BE study were minor. The sampling time deviations were considered to be insignificant and they did not compromise the outcome of the BE study.

The 90% CI for the least-squares geometric means of lnAUCt, lnAUC∞, and lnCmax calculated by the reviewer (for group 1 only) meet the CI criteria for BE (80.00% - 125.00%).

The median Tmax values for dextromethorphan and dextrorphan for the test product were similar to that for the reference product (dextromethorphan: 5.5 and 6.0 hours respectively; dextrorphan: 5.0 and 5.0 hours, respectively).

Summary and Conclusions, Single-Dose Fasting Bioequivalence Study:

Although the 90% CI for the least-squares geometric means of lnAUCt, lnAUC∞, and lnCmax meet the CI criteria for bioequivalence, the fasted study is incomplete (**inadequate)** at this time due to deficiencies listed in Section 3.10 of this review..

Table 18. Mean Plasma Concentrations, Single-Dose Fasting Bioequivalence Study

4.1.2 Single-dose Fed Bioequivalence Study

4.1.2.1 Study Design

Table 19. Study Information

Study Number	S08-0446
Study Title	A Relative Bioavailability Study of 30 mg / 5 mL Dextromethorphan Polistirex (Equivalent to 30 mg Dextromethorphan HBr) ER Oral Suspension Versus 30 mg / 5 mL Delsym® ER Oral Suspension Under Fed Conditions
Clinical Site (Name, Address, Phone #)	Cetero Research 400 Fountain Lakes Blvd. St. Charles, MO 63301 (314) 419-6592
Principal Investigator	Jeffrey P. Ciaramita, M.D.
Dosing Dates	Period I: 19 October 2008
	Period II: 02 November 2008
Analytical Site (Name, Address, Phone #)	(b) (4)
Analysis Dates	November 15, 2008 – December 05 2008
Analytical Director	(b) (6)
Storage Period of Biostudy Samples (no. of days from the first day of sample collection to the last day of sample analysis)	47 days

Table 20. Product Information

Product	**Test**	**Reference**
Treatment ID	A	B
Product Name	Dextromethorphan Polistirex ER Oral Suspension	Delsym® Oral Suspension
Manufacturer	Tris Pharma, Inc.	Adams Respiratory Therapeutics
Batch/Lot No.	TB-0023A	39469
Manufacture Date	09/03/08	N/A
Expiration Date	N/A	Dec 2008
Strength	30 mg per 5 mL (equivalent to 30 mg dextromethorphan HBr)	30 mg per 5 mL (equivalent to 30 mg dextromethorphan HBr)
Dosage Form	Oral Suspension	Oral Suspension
Bio-batch Size	(b) (4)	N/A
Production Batch Size		N/A
Potency	100.8%, 102.2%	96.4%, 99.4%
Content Uniformity (mean, %CV)	N/A	N/A

Deliverable Volume (mean, range)	100.8%, 100.0 - 101.7%	N/A
Dose Administered	10 mL, 60 mg	10 mL, 60 mg
Route of Administration	Oral	Oral

The reviewer assumes that the fed study was actually carried out on subjects dosed at 30 mg, and not at 60 mg.

Table 21. Study Design, Single-Dose Fed Bioequivalence Study

No. of Subjects	42 enrolled / 38 completed / 38 analyzed / 37 in Final Report (1 dropped because of pre-dose concentration)
No. of Sequences	2
No. of Periods	2
No. of Treatments	2
No. of Groups	1
Washout Period	14 days
Randomization Scheme	AB: 1, 2, 4, 9, 10, 11, 15, 16, 18, 19, 20, 21, 27, 28, 29, 31, 35, 36, 38, 39, 42 BA: 3, 5, 6, 7, 8, 12, 13, 14, 17, 22, 23, 24, 25, 26, 30, 32, 33, 34, 37, 40, 41 The firm specified in the protocol that 42 healthy male and female subjects would be enrolled. Highlighted yellow subjects did not complete the study, highlighted pink subject was dropped from the final analysis due to pre-dose concentration greater than 5% respective Cmax.
Blood Sampling Times	During each study period, 19 blood samples were collected (6 mL each) from each subject by direct venipuncture using pre-labeled vacutainers containing K2-EDTA as the anticoagulant. Blood sample collection was obtained within 90 minutes prior to administration of study product to the first study participant (Hour 0 only), and after dose administration at post-dose Hours 1, 2, 3, 4, 4.5, 5, 5.5, 6, 6.5, 7, 8, 10, 12, 16, 24, 36, 48 and 72.
Blood Volume Collected/Sample	Approximately 228 mL of blood was collected from each subject as pharmacokinetic samples over the course of the study. The actual times at which blood samples were collected are recorded and presented with each subject's Case Report Form.
Blood Sample Processing/Storage	Samples were cooled by an ice bath or Kryorack® until processed, centrifuged at approximately 3000 RPM at 4°C for 10 minutes and then placed into an ice bath or Kryorack®. Plasma was evenly divided and transferred into duplicate 10 mL polypropylene tubes and maintained in the ice bath or Kryorack®. Samples were then stored and frozen at approximately -70°C (±20°C) until shipment to the bioanalytical laboratory. The time between sample collection and placement in freezer did not exceed 1.5 hours. The frozen samples were shipped under dry ice to (b) (4) for assay.

IRB Approval	Yes (Approval dates – October 6 and 13, 2008)
Informed Consent	Yes
Length of Fasting Before Meal	Subjects fasted for at least 10 hours prior to dosing. Subjects consumed the FDA standardized high fat – high calorie meal starting 30 minutes before their assigned dosing time consisting of two (2) eggs cooked in butter, two (2) strips of bacon, two (2) slices of toast with butter, four (4) ounces of hash brown potatoes, and eight (8) fluid ounces of whole milk. Subjects fasted for four (4) hours after dosing.
Length of Confinement	Subjects meeting all entrance criteria were admitted and sequestered at the clinical facility for at least 10 hours pre-dose until 24 hours post-dose. Subjects returned to the clinic for blood collections at post-dose Hours 36, 48, and 72.
Safety Monitoring	The following assessments were completed within 28 days of Period I dosing: medical and medication history, physical examination, sitting blood pressure and heart rate, oral temperature, ECG, clinical laboratory evaluations, screens for HIV, Hepatitis B, Hepatitis C, drugs of abuse, and serum pregnancy test. All subjects gave written informed consent and were allowed to ask, and have answered, questions concerning the conduct of the study prior to enrollment in the study. Demographic data (including height, weight, age, gender, race, ethnicity and BMI) was collected for each subject. At study check-in, the subjects were briefly evaluated to assess if they continued to meet the study inclusion/exclusion criteria. In addition, a urine specimen was collected for drugs of abuse testing and a urine pregnancy test was performed. Blood pressure and pulse measurements were obtained within 90 minutes prior to administration of study product to the first study participant (Hour 0 only), within ±30 minutes of post-dose Hours 5, 12, 24, and at the discretion of the clinical staff. Study exit / early termination procedures were completed with the last blood sample collection. Procedures included general observations, blood pressure, heart rate, selected clinical laboratory measurements, and pregnancy screen.

Standard FDA Meal Used?	YES	
If No, then meal components and composition is listed in the tables below		
Composition of Non-standard FDA Meal Used in Fed Bioequivalence Study		
Composition	**Percent**	**Kcal**
Fat	N/A	
Carbohydrate		
Protein		
Total		

Comments on Study Design:

The study design is acceptable (adequate).

Comments on Adverse Events/Protocol Deviations:

A single subject vomited after dosing with the reference product. This subject (# 05) was dropped from the study. The reviewer agrees with the handling of subject # 05.

The firm's handling of dropouts, adverse events and protocol deviations are acceptable.

4.1.2.3 Bioanalytical Results

Table 26. Assay Validation – Within the Fed Bioequivalence Study

Dextromethorphan:

Bioequivalence Study No. Study No. S08-0446 Dextromethorphan

Linearity	0.9925 – 0.9976									
Linearity Range (pg/mL)	10.00 – 10000									
Sensitivity/LOQ (pg/mL)	10.00									

Bioequivalence Study No. Study No. S08-0446 Dextrorphan				
Parameter	**Quality Control Samples**			
Concentration (pg/mL)	30.00	750.0	4500	8000
Inter day Precision (CV)	37.9	2.8	3.5	3.0
Inter day Accuracy (%Bias)	18.0	3.5	0.0	-5.2

Comments on Study Assay Validation:

Acceptable.

Any interfering peaks in chromatograms?	No
Were 20% of chromatograms included?	Yes
Were chromatograms serially or randomly selected?	Serially (1-11, i.e. batch run 1-3))

Comments on Chromatograms:

Acceptable.

Table 27. SOP's Dealing with Bioanalytical Repeats of Study Samples

SOP No.	Effective Date of SOP	SOP Title
(b) (4)		Sample Reanalysis and Reporting Criteria

Table 28. Additional Comments on Repeat Assays

Were all SOPs followed?	See comments below
Did recalculation of PK parameters change the study outcome?	See comments below
Does the reviewer agree with the outcome of the repeat assays?	See comments below
If no, reason for disagreement	N/A

Summary/Conclusions, Study Assays:

The reviewer is requesting from the firm more data to validate that they did follow their SOP with regard to re-analysis of subject samples due to high/low internal standard responses.

Test	36	0.99	0.97	1.00
Reference	36	0.99	0.95	1.00

Comments on Pharmacokinetic and Statistical Analysis:

The subjects in the fed BE study were dosed in one group. Data from Reviewer's calculations were generated using SAS code "CALCKE".

Because of several discrepancies between summary tables and the fed study report submitted by the firm to the Agency, the reviewer was unable to definitively state that the fed study was carried out on subjects dosed with 30 mg (i.e. 5 mL), in contrast to the 60 mg in the fasted study. However, based on the plasma profiles (approximately half the Cmax compared to the fasted study), the reviewer is assuming that the concentration was indeed 30 mg dosed. The firm will be asked to clarify if this assumption is correct or not.

Blood sampling deviations during the fed BE study were minor. The sampling time deviations were considered to be insignificant and they did not compromise the outcome of the BE study.

The 90% CI for the least-squares geometric means of lnAUCt, lnAUC∞, and lnCmax calculated by the reviewer agree with the firm's calculations and meet the CI criteria for BE (80.00% - 125.00%).

The median Tmax values for dextromethorphan and dextrorphan for the test product were similar to that for the reference product (dextromethorphan: 5.5 and 6.0 hours respectively; dextrorphan: 5.0 and 5.0 hours, respectively).

Summary/Conclusions, Single-Dose Fed Bioequivalence Study:

Although the 90% CI for the least-squares geometric means of lnAUCt, lnAUC∞, and lnCmax meet the CI criteria for bioequivalence, the fed study is **inadequate** at this time due to deficiencies listed in Section 3.10 of this review.

Reviewer's comments on dissolution:

The firm submitted comparative dissolution testing data for both the firm's proposed method and the FDA-recommended method. The sampling for the dissolution testing conducted using the FDA-recommended method was not taken to the time point of complete dissolution: At 180 minutes, less than (b)(4)% LC of both the test and RLD products was dissolved.

However, the firm also conducted dissolution with its own proposed method. The firm's method provided faster dissolution at 180 minutes for both the test and RLD product. The firm's method is sufficiently discriminating. For this reason, the firm's proposed method was accepted by the 'dissolution only' reviewer.

On September 25, 2009, the firm has acknowledged the following dissolution method and specifications: 500 mL of 0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr at 37°C, using USP Apparatus II (Paddle) at 50 rpm. Specifications = 1 hr: NMT (b)(4)%, 3 hrs: (b)(4)% - (b)(4)%, 6 hrs: (b)(4)% - (b)(4)% and 12 hrs: NLT (b)(4)%.

On October 9, 2009, the firm submitted an additional amendment updating the new product dissolution specification, release specification and stability specification, as well as submitted additional stability data. With regard to the change in the dissolution specification, this reviewer finds the amendment acceptable (adequate). The chemistry team will need to further review this amendment.

The comparative dissolution testing is acceptable (adequate) at this time.

BIOEQUIVALENCE DEFICIENCIES TO BE PROVIDED TO THE APPLICANT

ANDA: 091135

APPLICANT: Tris Pharma, Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg Dextromethorphan Hydrobromide per 5 mL

The Division of Bioequivalence (DBE) has completed its review of your submission acknowledged on the cover sheet. The following deficiencies have been identified:

1. Please acknowledge for future submissions that a more appropriate standard curve (SC) and quality control (QC) concentration range should be validated, which fully encompasses the expected plasma concentration ranges for all subjects. Specifically, the Agency recommends you avoid situations in which many subject samples have to be re-assayed due to initial measurements determined as being 'above the limit of quantitation (ALOQ)', which was the case for the fasting study # S08-0445.

2. It was not fully clear whether the fed study # S08-0446 was carried out using a dose of 60 mg (like the fasted study), or a dose of 30 mg as recommended in the draft individual bioequivalence recommendation guidance for the drug product. In the fed study report (page 2 of 547) it lists the dose as 30 mg; however, in the *in vivo* BE summary table, it lists 60 mg as the dose administered. Please clarify which dose was used for the fed bioequivalence (BE) study.

3. With regard to the repeat analyses, please submit the following additional information:

a. Please submit all appropriate raw data (for fasting and fed BE studies) supporting repeat analysis of samples for high/low internal standard responses (HIS/LIS). These repeats should meet the objective criterion established in the SOP (b) (4), page 8 of 19, which says that results are flagged for repeat when there is a deviation by more than 40% of the mean IS for the entire batch run.

b. Please submit the analytical procedure document defining the reason for the "sample processing error" for subject #41, hour 5.5 sample, per SOP (b) (4) : Sample Reanalysis and Reporting Criteria.

We acknowledge you will conduct dissolution testing for your test product as follows:

The dissolution testing should be conducted in 500 mL of 0.1 N HCl at 37°C + 0.5°C, with addition of 400 mL of Phosphate Buffer, at 37°C + 0.5°C, after 1 hr sampling, using USP apparatus II (Paddle) at 50 rpm. The test product should meet the following specifications:

1 hr: NMT (b) (4) %
3 hrs: (b) (4) %
6 hrs: (b) (4) %
12 hrs: NLT (b) (4) %.

Sincerely yours,

{See appended electronic signature page}

Clinical Site Address	400 Fountain Lakes Blvd. St. Charles, MO 63301 (314) 419-6592	
Analytical Site	(b) (4)	
Analytical Address		
OUTCOME DECISION	**INCOMPLETE**	

I. EXECUTIVE SUMMARY

This is a review of the dissolution amendment submitted on August 14, 2009.

The firm submitted comparative dissolution testing data for both the firm's proposed method and the FDA-recommended method. The firm conducted dissolution testing using the FDA-recommended method in 500 mL of 0.1 N HCl using Apparatus II (Paddles) at 50 rpm. The sampling times are 30, 60, 90, and 180 minutes. The sampling for the dissolution testing conducted using the FDA-recommended method was not taken to the time point of complete dissolution: At 180 minutes, less than (b) (4)% LC of both the test and RLD products was dissolved.

However, the firm also conducted dissolution with its own proposed method: 500 mL of 0.1 N HCl using USP Apparatus II (Paddles) at 50 rpm followed by addition of 400 mL of Phosphate Buffer after 1 hr sample. The sampling times are 1, 3, 6 and 12 hours. The firm's proposed method can only be compared partially as the sampling times were not the same as used in the FDA method. The firm's method provided faster dissolution at 180 minutes for both the test and RLD product, (b) (4) The variability for the firm's method was slightly better based on the CV% data. In addition, the firm's method is sufficiently discriminating. For this reason, the firm's proposed method is accepted.

However, the firm's proposed specifications for the 3-hour and 12-hour sampling time points are too liberal and not acceptable. The firm should acknowledge the following FDA-recommended specifications with their proposed method.

Specifications: 1 hr: NMT (b) (4)%, 3 hrs: (b) (4)% - (b) (4)%, 6 hrs: (b) (4)% - (b) (4)%, 12 hrs: NLT (b) (4)%.

The firm also submitted acceptable multi-media dissolution testing data using USP Apparatus II at 50 rpm in four dissolution media (pH 1.2, pH 4.5 and pH 6.8 buffers and water).

The Division of Scientific Investigations (DSI) inspection of the analytical sites was completed on (b) (4) and the outcome is reported as (b) (4). The DSI inspection of the clinical site is pending for a related ANDA 90740.

The dissolution testing is acceptable pending the firm's acknowledgement of the firm's proposed method and the FDA recommended data driven specifications.

The DBE will review the fasted and fed BE studies at a later date.

Table 1: SUBMISSION CONTENT CHECKLIST

Information			YES	NO	N/A
Did the firm use the FDA-recommended dissolution method			☒	☐	☐
Did the firm use the USP dissolution method			☐	☒	☐
Did the firm use 12 units of both test and reference in dissolution testing			☒	☐	☐
Did the firm provide complete dissolution data (all raw data, range, mean, % CV, dates of dissolution testing)			☒	☐	☐
Did the firm conduct dissolution testing with its own proposed method			☒	☐	☐
Is FDA method in the public dissolution database (on the web)			☒	☐	☐
SAS datasets submitted to the electronic document room (edr)	Fasting BE study	PK parameters	☒	☐	☐
		Plasma concentrations	☒	☐	☐
	Fed BE study	PK parameters	☒	☐	☐
		Plasma concentrations	☒	☐	☐

III. COMMENTS:

This is a review of firm's response to the dissolution deficiencies:

Deficiency 1:

Please provide the final pH of your dissolution medium after 400 mL of phosphate buffer was added.

Response 1:

The final pH of the Tris in-house dissolution medium after 400 mL of phosphate buffer was added is 6.8 ± 0.2.

Reviewer Comments: The firm's response is acceptable.

Deficiency 2:

Please conduct and submit dissolution testing on the test and reference products (12 dosage units each) using the following FDA-recommended method:

Apparatus:	*USP II (Paddle)*
Speed of Rotation:	*50 rpm*
Medium:	*0.1 N HCl*
Volume:	*500 mL*
Temperature:	*37°C ± 0.5°C*

The recommended sampling times are 30, 60, 90, and 180 minutes or until at least 80% of the labeled amount of the drug is dissolved. Your proposed method will be evaluated in comparison with the FDA-recommended method when the dissolution data from both methods are available.

Response 2:

Dissolution testing for the test and reference products (12 dosage units each) using the FDA recommended method was provided in the ANDA Original Submission, Sequence 0000, in Module 5.3.1.3 "Dissolution Profile Study".

However, for ease of OGD review the summary table has been included in Module 2.7 "Bioequivalence Data Summary Tables" and the full information including a summary table, individual unit results, and a comparative chart have been represented in Module 5.3.1.3 "In-Vitro-In-Vivo Correlation Study Reports".

Dissolution sampling was stopped at 180 minutes as the test and reference products only showed limited amount of dextromethorphan release, i.e. (b) (4)% and (b) (4)% dissolved, respectively. Furthermore, little change in percent dissolved from 30 minutes to 180 minutes is seen for the test and reference products, i.e. (b) (4)% and (b) (4)%, respectively, indicating a plateau is reached. Tris does not believe that 80% dissolution would be attained due to the equilibrium resulting from the binding affinity, as well as the ionic species/strength present in the dissolution medium.

Tris believes that our in-house method is a more discriminating method than the FDA-recommended method. Not only does our in-house method include a change in pH which is similar to in vivo conditions, but it also exhibits the extended release properties of the product; therefore, Tris proposes the in-house method for release and stability testing.

Reviewer Comments:

The firm's proposed method can only be compared partially as the sampling times were not the same as used in the FDA method. The firm's method provided faster dissolution at 180 minutes for both the test and RLD product, i.e., (b) (4)% and (b) (4)%, respectively. The variability for the firm's method was slightly better based on the CV% data. In addition, the firm's method is sufficiently discriminating. For this reason, the firm's proposed method is accepted. However, specifications for 3-hour and 12-hour sampling time points are too liberal and not acceptable. The firm should acknowledge the following FDA-recommended specifications with their proposed method.

Apparatus:	USP II (Paddle)
Speed of Rotation:	50 rpm
Medium:	0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr sample.
Volume:	500 mL
Temperature:	37 ºC ± 0.5 ºC

Specifications: 1 hr: NMT (b) (4)%, 3 hrs: (b) (4)%, 6 hr: (b) (4)%, 12 hr: NLT (b) (4)%.

Deficiency 3:

Please conduct and submit dissolution testing data using USP Apparatus II (Paddles) at 50 rpm in at least three additional dissolution media (pH 4.5 and 6.8 buffers and water). The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of labeled amount of the drug is dissolved.

Response 3:

Dissolution testing for the test and reference products (12 dosage units each) in three additional dissolution media (pH 1.2, 4.5, and 6.8 buffers) was provided in the ANDA Original Submission, Sequence 0000, in Module 5.3.1.3 "Dissolution Profile Study".

However, for ease of OGD review the summary tables have been included in Module 2.7 "Bioequivalence Data Summary Tables" and the full information including summary tables, individual unit results, and comparative charts have been represented in Module 5.3.1.3 "In-Vitro-In-Vivo Correlation Study Reports". Also, dissolution testing in water as suggested by the Agency has been performed and is also provided.

Dissolution sampling was stopped at 12 hours for all of these additional media (pH 1.2, 4.5, and 6.8 buffers and water) as the test and reference products showed little change in percent dissolved after 4 to 6 hours indicating a plateau is reached.

Reviewer Comments: The firm's response is acceptable.

Deficiency 4:

Comparative dissolution profiles of all additional dissolution testing should include individual dosage unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units of each lot tested.

Response 4:

The full information including summary tables, individual unit results, and comparative charts represented in Module 5.3.1.3 "In-Vitro-In-Vivo Correlation Study Reports" show individual dosage unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units of each lot tested as requested by the Agency.

Reviewer Comments: The firm's response is acceptable.

Deficiency 5:

Please provide summary tables for the dissolution testing data in eCTD table format.

Response 5:

Summary tables for the dissolution testing data have been included in the eCTD table format in this submission. Refer to Module 2.7 "Bioequivalence Data Summary Tables".

Other Information

Upon review of the Bioequivalence Data Summary Tables submitted in the ANDA Original Submission, Sequence 0000, it was observed that there were errors in Tables 2 and 3. These Tables have been revised for this submission. Refer to Module 2.7 "Bioequivalence Data Summary Tables" and Module 2.7.1.3 "Comparison and Analyses of Results Across Studies".

Reviewer Comments: The firm's response is acceptable.

IV. DEFICIENCY COMMENT:

The firm is requested to acknowledge the DBE recommended specifications (provided in the recommendations section).

V. RECOMMENDATIONS:

The in vitro dissolution testing conducted by Tris Pharma Inc. on its Dextromethorphan Polistirex Extended Release Oral Suspension, 30 mg/5 mL is acceptable. Based on the submitted dissolution data, the firm is requested to acknowledge the following FDA-specifications for their proposed method:

Apparatus:	USP II (Paddle)
Speed of Rotation:	50 rpm
Medium:	0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr sample.
Volume:	500 mL
Temperature:	37 ºC ± 0.5 ºC

Specifications: 1 hr: NMT (b) (4)%, 3 hrs: (b) (4)%, 6 hrs: (b) (4)%, 12 hrs: NLT (b) (4)%.

The firm should be informed of the above deficiency comment and recommendations.

BIOEQUIVALENCE DEFICIENCY

ANDA: 91-135

APPLICANT: Tris Pharma Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension, 30 mg /5 mL

The Division of Bioequivalence has completed its review of the dissolution portion of the submission acknowledged on the cover sheet. The review of the bioequivalence studies will be conducted later. The following deficiency has been identified:

Based on the dissolution testing data you submitted, we agree that your proposed dissolution method is appropriate for your test product. We also agree with your proposed dissolution method and specifications for the sampling times of 1 and 6 hours. However, the specifications for the sampling time points at 3 hours and 12 hours are not acceptable. Based on the data submitted, we recommend more appropriate specifications. Please provide acknowledgement for your acceptance of the following FDA-recommended specifications for your proposed dissolution method:

Apparatus:	USP II (Paddle)
Speed of Rotation:	50 rpm
Medium:	0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr.
Volume:	500 mL
Temperature:	37 °C ± 0.5 °C
Specifications:	1 hr: NMT (b)(4)% 3 hrs: (b)(4)% 6 hrs: (b)(4)% 12 hrs: NLT (b)(4)%.

Sincerely yours,

{See appended electronic signature page}

OUTCOME DECISION	**INCOMPLETE**	

I. EXECUTIVE SUMMARY

This is a review of the dissolution testing data only.

The dissolution testing conducted by the firm is incomplete. The firm conducted dissolution testing in 500 mL of 0.1 N HCl using Apparatus II (Paddles) at 50 rpm, with addition of 400mL of Phosphate Buffer after 1 hr sample. The sampling times are 1, 3, 6 and 12 hours. The firm should conduct dissolution testing using the following FDA-recommended dissolution method: 500 mL of 0.1 N HCl using USP Apparatus II (Paddles) at 50 rpm. The sampling times are 30, 60, 90, and 180 minutes or until at least 80% of the drug is dissolved. The firm should also submit multi-media dissolution testing data using USP Apparatus II at 50 rpm in at least three dissolution media (pH 4.5 and 6.8 buffers and water). The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of the drug is dissolved. Comparative dissolution profiles should include individual unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units. Specifications will be determined upon review of the data submitted in the application.

The Division of Scientific Investigations (DSI) inspection of the analytical sites was completed in (b) (4) and the outcome is reported as (b) (4). The DSI inspection of the clinical site is pending for a related ANDA 90740.

The dissolution testing is incomplete.

Table 1: SUBMISSION CONTENT CHECKLIST

	Other study	PK parameters	☐	☐	☒
		Plasma concentrations	☐	☐	☒
Are the DBE Summary Tables present an in either PDF and/or MS Word Format?			☒	☐	☐
If any of the tables are missing or incomplete please indicate that in the comments and request the firm to provide the complete DBE Summary Tables 1-16.					
Is the Long Term Storage Stability (LTSS) sufficient to cover the maximum storage time of the study samples?			☒	☐	☐
If the LTSS is NOT sufficient please request the firm to provide the necessary data.					

The firm did not provide summary table for dissolution data using multi media.

The firm conducted dissolution testing the following its own proposed method Medium: 500 mL of 0.1 N HCl **for 1 hr and after sampling add 400mL of Phosphate Buffer,** using USP Apparatus II at 50 rpm.

Current FDA recommendations for this product from FDA website for individual product guidance are:

Drug Name	Dosage Form	USP Apparatus	Speed (RPMs)	Medium	Volume (mL)	Recommended Sampling Times (minutes)	Date Updated
Dextromethorphan Polistirex	Suspension (Extended Release)	II (Paddle)	50	0.1 N HCl	500	30, 60, 90 and 180	10/06/2008

For modified release products, dissolution profiles generated using USP Apparatus I at 100 rpm and/or Apparatus II at 50 rpm in at least three dissolution media (pH 1.2, 4.5 and 6.8 buffer, water) should be submitted in the application. Agitation speeds may have to be increased if appropriate. It is acceptable to add a small amount of surfactant, if necessary. The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of the drug is dissolved. Comparative dissolution profiles should include individual unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units. Specifications will be determined upon review of the data submitted in the application.

III. COMMENTS:

1. The dissolution testing conducted is incomplete. The firm conducted dissolution testing using Apparatus II (Paddles) at 50 rpm in 500 mL of 0.1 N HCl for 1 hr and after sampling added 400mL of Phosphate Buffer.

2. The firm should conduct dissolution testing using the following FDA-recommended dissolution method: 500 mL of 0.1 N HCl using USP Apparatus II (Paddles) at 50 rpm. The sampling times are 30, 60, 90, and 120 minutes or until at least 80% of the drug is dissolved.

3. The firm should also submit multi-media dissolution testing data using USP Apparatus II at 50 rpm in at least three dissolution media (pH 4.5 and 6.8 buffers and water). The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of the drug is dissolved. Comparative dissolution profiles should include individual dosage unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units. Specifications will be determined upon review of the data submitted in the application.

IV. DEFICIENCY COMMENT:

1. The firm should conduct and submit dissolution testing on the test and reference products (12 dosage units each) using the following FDA-recommended method:

Medium: 500 mL of 0.1 N HCl using USP Apparatus II (Paddles) at 50 rpm. The sampling times are 30, 60, 90, and 180 minutes or until at least 80% of the drug is dissolved.

2. The firm should also submit multi-media dissolution data using USP Apparatus II at 50 rpm in at least three dissolution media (pH 1.2, 4.5 and 6.8 buffers) and water. The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of the drug is dissolved. Comparative dissolution profiles should include individual dosage unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units.

3. The firm should provide summary tables for the dissolution testing data in multimedia to test and reference.

V. RECOMMENDATIONS:

The dissolution testing conducted by Tris Pharma Inc. on its Dextromethorphan Polistirex Extended Release Oral Suspension, 30 mg/5 mL is incomplete. The dissolution testing should be conducted in 500 mL of 0.1 N HCl using USP Apparatus II (Paddles) at 50 rpm. The sampling times are 30, 60, 90, and 180 minutes or until at least 80% of the drug is dissolved.

The firm should also submit multi-media dissolution data using USP Apparatus II at 50 rpm in at least three dissolution media (pH 4.5 and 6.8 buffers and water). The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of the drug is dissolved. Comparative dissolution profiles should include individual dosage unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units. The firm should provide summary tables for the dissolution testing data in multimedia to test and reference.

BIOEQUIVALENCE DEFICIENCY

ANDA: 91-135

APPLICANT: Tris Pharma Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension 30 mg /5 mL

The Division of Bioequivalence has completed its review of the dissolution portion of the submission acknowledged on the cover sheet. The review of the bioequivalence studies will be conducted later. The following deficiency has been identified:

Your dissolution testing using your proposed method is incomplete. Please provide the final pH of your dissolution medium after 400 mL of phosphate buffer was added. In addition, please conduct and submit dissolution testing on the test and reference products (12 dosage units each) using the following FDA-recommended method:

Apparatus:	USP II (Paddle)
Speed of Rotation:	50 rpm
Medium:	0.1 N HCl
Volume:	500 mL
Temperature:	37 °C ± 0.5 °C

The recommended sampling times are 30, 60, 90, and 180 minutes or until at least 80% of the labeled amount of the drug is dissolved. Your proposed method will be evaluated in comparison with the FDA-recommended method when the dissolution data from both methods are available.

Please also conduct and submit dissolution testing data using USP Apparatus II (Paddles) at 50 rpm in at least three additional dissolution media (pH 4.5 and 6.8 buffers and water). The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of the labeled amount of the drug is dissolved.

Comparative dissolution profiles of all additional dissolution testing should include individual dosage unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units of each lot tested. Please also provide summary tables for the dissolution testing data in eCTD table format.

Sincerely yours,

{See appended electronic signature page}

Comments:ANDA TA'd on 4/20/2011. At the time the TA was issued the reason given for TA was an unexpired 30 month stay of approval. This stay of approval expired on 11/15/2011. This ANDA holds the exclusivity seat for this product and they secured TA within 30 months of their submission date. As the 30 month stay of approval has expired, this ANDA is eligible for immediate Full Approval with an award of 180 day exclusivity. Addendum: Tris has informed the agency that on December 21, 2011, the district court granted Tris Pharma's motion for summary judgment of the asserted patent claims.

Subject: RE: ANDA 91135

Hi Sarah,

I checked DARRTS, Orange Book, Drugs@fda.gov, and USP. The labeling concurrence from December 2011 is still valid.

Thanks,

Jeanne

Hi Jeanne,

This package has been sitting with Bob W since Dec 2011 and now ready for full approval now that EES has come back AC. Can you check to see if labeling is still ok? You signed off with John back in December 2011. Thanks!

Regards,

Sarah

6. Peter Rickman **Date 5/24/12**
Director, DLPS **Initials rlw/for**
Para.IV Patent Cert: Yes☐ No☐
Pending Legal Action: Yes ☐ No ☐
Petition: Yes☐ No☐
Comments: This ANDA was granted tentative approval on April 20, 2011. Final approval was blocked at that time by Tris Pharma's paragraph IV certification to the '882 patent and the subsequent legal action. Refer to the administrative sign-off form created at the time of the tentative approval. At present, the 30-month statutory stay of approval as a result of the ongoing legal action has expired and this ANDA is eligible for final approval.

Bioequivalence addendum - Revised in-vitro dissolution specification (1 hour) revised from NMT % to NMT %. Office-level bio endorsed 7/28/11.

Final-printed labeling found acceptable for approval 11/18/11, as endorsed 5/22/12. No REMS is required.

CMC found acceptable for approval (Chemistry Review #4) 12/16/11. There have been no CMC updates to the ANDA since this date.

AND/OR

7. Robert L. West **Date 5/25/12**
Deputy Director, OGD **Initials RLWest**
Para.IV Patent Cert: Yes☒ No☐
Pending Legal Action: Yes☒ No☐

Press Release Acceptable ☐
Date PETS checked for first generic drug _____

Comments: Acceptable EES dated 5/21/12 (Verified 5/24/12). No "OAI" Alerts noted.

Tris Pharma provided a paragraph IV certification to the '882 patent and was sued within the 45-day period. The 30-month

statutory hold associated with the ongoing litigation has expired. In addition, on December 21, 2011, the district court granted Tris Pharma's motion for summary judgment of noninfringement of the asserted patent claims.

This ANDA is recommended for approval.

BIOEQUIVALENCE AMENDMENT

ANDA 091135

OFFICE OF GENERIC DRUGS, CDER, FDA
Document Control Room, Metro Park North VII
7620 Standish Pl.
Rockville, MD 20855-2810

APPLICANT: Tris Pharma, Inc. TEL: (732) 940-0358

ATTN: W. Scott Groner FAX: (732) 940-0374

FROM: Diana Solana-Sodeinde FDA CONTACT PHONE: (240) 276-8782

Dear Sir:

This facsimile is in reference to the bioequivalence data submitted on January 9, 2009, pursuant to Section 505(j) of the Federal Food, Drug, and Cosmetic Act for Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL.

Reference is also made to your amendments dated September 25, 2009; October 9, 2009 and March 4, 2011.

The Division of Bioequivalence has completed its review of the submissions referenced above and has comments and recommendations which are presented on the attached **1** page. This facsimile is to be regarded as an official FDA communication and unless requested, a hard-copy will not be mailed.

You may submit a response to these comments and recommendations in accord with 21 CFR 314.96. **Facsimiles or partial replies will not be considered for review.** If you respond, your cover letter should clearly indicate:

Bioequivalence Information

If applicable, please clearly identify any new studies (i.e., fasting, fed, multiple dose, dissolution data, waiver or dissolution waiver) that might be included for each strength. We also request that you include a copy of this **communication with your response.**
Please submit a copy of your amendment in an archival (blue) jacket and unless submitted electronically through the gateway, a review (orange) jacket. Please direct any questions concerning this communication to the project manager identified above.

Please remember that when changes are requested to your proposed dissolution methods and/or specifications by the Division of Bioequivalence, an amendment to the Division of Chemistry should also be submitted to revise the release and stability specification. We also recommend that supportive dissolution data or scientific justification be provided in the CMC submission to demonstrate that the revised dissolution specification will be met over the shelf life of the drug product.

SPECIAL INSTRUCTIONS:

*Effective **01-Aug-2010**, the new mailing address for Abbreviated New Drug Application (ANDA) Regulatory Documents is:*

Office of Generic Drugs
Document Control Room, Metro Park North VII
7620 Standish Place
Rockville, Maryland 20855-2810

ANDAs will only be accepted at the new mailing address listed above. For further information, please refer to the following websites prior to submitting your ANDA Regulatory documents: Office of Generic Drugs (OGD): http://www.fda.gov/cder/ogd or Federal Register: http://www.gpoaccess.gov/fr/

Please submit your response in electronic format. This will improve document availability to review staff.

ANDA: 091135

APPLICANT: Tris Pharma, Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended-Release Oral Suspension, EQ. 30 mg Dextromethorphan Hydrobromide per 5 mL

The Division of Bioequivalence (DBE) has completed its review of the "additional information" section from your amendment dated March 4, 2011. In this section, you requested that the Agency change the 1 hour dissolution specification from *NMT* (b)(4)% to *NMT* (b)(4)% dissolved in 1 hour. In support of this request, you submitted stability testing results from the biobatch (#TB-023A) as well as an additional lot (#TB-081A).

Your proposed dissolution specifications based on stability data are not acceptable. Since FDA-recommended dissolution specification is determined based on the data of the freshly manufactured biobatch, which underwent acceptable bioequivalence testing and not on the aged batches, the rationale used for justifying your proposed dissolution specifications are not acceptable.

However, the DBE has re-evaluated the previously recommended 1 hour specification of *NMT* (b)(4)% and considered it too restrictive with respect to the mean and range of the data at this time point. Therefore, the DBE has revised the recommended specification of *NMT* (b)(4)% to *NMT* (b)(4)% in 1 hour. It is important to emphasize that the revised dissolution specification is based on the original dissolution testing results submitted for the freshly manufactured biobatch and not on stability data of aged batches.

The DBE acknowledges that you will continue to conduct dissolution testing in 500 mL of 0.1 N HCl at 37°C + 0.5°C with the addition of 400 mL of Phosphate Buffer, at 37°C + 0.5°C, after 1 hr sampling, using USP apparatus II (Paddle) at 50 rpm.

The test product should meet the following specifications:

1 hr:	**NMT** (b)(4)**%**
3 hrs:	(b)(4)%
6 hrs:	(b)(4)%
12 hrs:	NLT (b)(4)%

Sincerely yours,

{See appended electronic signature page}

Dale P. Conner, Pharm.D.
Director, Division of Bioequivalence I
Office of Generic Drugs
Center for Drug Evaluation and Research

BIOEQUIVALENCE AMENDMENT

ANDA 091135

OFFICE OF GENERIC DRUGS, CDER, FDA
Document Control Room, Metro Park North II
7500 Standish Place, Room 150
Rockville, MD 20855-2773 (240-276-9327)

APPLICANT: Tris Pharma, Inc. TEL: 732-940-0358

ATTN: W. Scott Groner FAX: 732-940-0374

FROM: Teresa Ramson FDA CONTACT PHONE: (240) 276-8782

Dear Sir:

This facsimile is in reference to the bioequivalence data submitted on January 9, 2009, pursuant to Section 505(j) of the Federal Food, Drug, and Cosmetic Act for Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg dextromethorphan hydrobromide per 5 mL.

Reference is also made to your amendments dated September 25, 2009 and on October 9, 2009.

The Division of Bioequivalence has completed its review of the submission(s) referenced above and has identified deficiencies which are presented on the attached **2** pages. This facsimile is to be regarded as an official FDA communication and unless requested, a hard-copy will not be mailed.

You should submit a response to these deficiencies in accord with 21 CFR 314.96. Your amendment should respond to all the deficiencies listed. **Facsimiles or partial replies will not be considered for review.** Your cover letter should clearly indicate:

Bioequivalence Response to Information Request

If applicable, please clearly identify any new studies (i.e., fasting, fed, multiple dose, dissolution data, waiver or dissolution waiver) that might be included for each strength. We also request that you include a copy of this **communication with your response.**

Please submit a copy of your amendment in an archival (blue) jacket and unless submitted electronically through the gateway, a review (orange) jacket. Please direct any questions concerning this communication to the project manager identified above.

Please remember that when changes are requested to your proposed dissolution methods and/or specifications by the Division of Bioequivalence, an amendment to the Division of Chemistry should also be submitted to revise the release and stability specification. We also recommend that supportive dissolution data or scientific justification be provided in the CMC submission to demonstrate that the revised dissolution specification will be met over the shelf life of the drug product.

SPECIAL INSTRUCTIONS:

Effective 01-Aug-2010, the new mailing address for Abbreviated New Drug Application (ANDA) Regulatory Documents will be:

Office of Generic Drugs
Document Control Room
7620 Standish Place
Rockville, Maryland 20855

After the effective date, 01-Aug-2010, ANDAs will only be accepted at the new mailing address listed above. DO NOT submit your ANDA Regulatory documents to this address prior to 01-Aug-2010. For further information, please refer to the following websites prior to submitting your ANDA Regulatory documents: Office of Generic Drugs (OGD): http://www.fda.gov/cder/ogd or Federal Register: http://www.gpoaccess.gov/fr/

Please submit your response in electronic format. This will improve document availability to review staff.

ANDA: 091135

APPLICANT: Tris Pharma, Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension, EQ. 30 mg Dextromethorphan Hydrobromide per 5 mL

The Division of Bioequivalence (DBE) has completed its review of your submission acknowledged on the cover sheet. The following deficiencies have been identified:

1. Please acknowledge for future submissions that a more appropriate standard curve (SC) and quality control (QC) concentration range should be validated, which fully encompasses the expected plasma concentration ranges for all subjects. Specifically, the Agency recommends you avoid situations in which many subject samples have to be re-assayed due to initial measurements determined as being 'above the limit of quantitation (ALOQ)', which was the case for the fasting study # S08-0445.

2. It was not fully clear whether the fed study # S08-0446 was carried out using a dose of 60 mg (like the fasted study), or a dose of 30 mg as recommended in the draft individual bioequivalence recommendation guidance for the drug product. In the fed study report (page 2 of 547) it lists the dose as 30 mg; however, in the *in vivo* BE summary table, it lists 60 mg as the dose administered. Please clarify which dose was used for the fed bioequivalence (BE) study.

3. With regard to the repeat analyses, please submit the following additional information:

a. Please submit all appropriate raw data (for fasting and fed BE studies) supporting repeat analysis of samples for high/low internal standard responses (HIS/LIS). These repeats should meet the objective criterion established in the SOP (b) (4), page 8 of 19, which says that results are flagged for repeat when there is a deviation by more than 40% of the mean IS for the entire batch run.

b. Please submit the analytical procedure document defining the reason for the "sample processing error" for subject #41, hour 5.5 sample, per SOP (b) (4): Sample Reanalysis and Reporting Criteria.

We acknowledge you will conduct dissolution testing for your test product as follows:

The dissolution testing should be conducted in 500 mL of 0.1 N HCl at 37°C + 0.5°C, with addition of 400 mL of Phosphate Buffer, at 37°C + 0.5°C, after 1 hr sampling, using USP apparatus II (Paddle) at 50 rpm. The test product should meet the following specifications:

1 hr: NMT (b) (4) %
3 hrs: (b) (4) %
6 hrs: (b) (4) %
12 hrs: NLT (b) (4) %.

Sincerely yours,

{See appended electronic signature page}

Dale P. Conner, Pharm.D.
Director, Division of Bioequivalence I

REVIEW OF PROFESSIONAL LABELING #2
DIVISION OF LABELING AND PROGRAM SUPPORT
LABELING REVIEW BRANCH

ANDA Number: 091135

Date of Submission: August 26, 2010

Applicant's Name: Tris Pharma, Inc.

Established Name: Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg per 5 mL

Propriety Name: None

Labeling Deficiencies:

A. CONTAINER & CARTON LABELS:

Please revise established name to read, “DEXTROMETHORPHAN POLISTIREX EXTENDED-RELEASE ORAL SUSPENSION”.

B. DOSAGE CUP:

Please provide the final printed labeling (FPL) for the dosage cup.

Please submit labels and labeling in electronic format.

Prior to approval, it may be necessary to revise your labeling subsequent to approved changes for the reference listed drug. In order to keep ANDA labeling current, we suggest that you subscribe to the daily or weekly updates of new documents posted on the CDER web site at the following address - http://service.govdelivery.com/service/subscribe.html?code=USFDA_17.

To facilitate review of your next submission please provide a side-by-side comparison of your proposed labeling with the last approved labeling of the Reference Listed Drug with all differences annotated and explained.

REVIEW OF PROFESSIONAL LABELING #1
DIVISION OF LABELING AND PROGRAM SUPPORT
LABELING REVIEW BRANCH

ANDA Number: 091135

Date of Submissions: January 9, 2009 and October 29, 2009

Applicant's Name: Tris Pharma, Inc.

Established Name: Dextromethorphan Polistirex Extended-release Oral Suspension, 30 mg per 5 mL

Propriety Name: None

Labeling Deficiencies:

A. CARTON LABELS:

1. We note that the (b) (4) Please revise so that the strength and the established name are prominent in the principal display panel.

2. In the "*Directions*" section, please add "Do not use dosing cup with other products."

3. In the "*DOSING*" section, please add "Measure only with dosing cup provided. Do not use dosing cup with other products." after "SHAKE WELL BEFORE USE."

B. CONTAINER LABELS:

In the "WARNINGS" section, please revise to read "Do not use if you are now taking a prescription Monoamine Oxidase Inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's Disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product."

Please note that RLD's labeling is attached since labeling is not available at Drugs@FDA website.

Please submit labels and labeling in electronic format.

Prior to approval, it may be necessary to revise your labeling subsequent to approved changes for the reference listed drug. In order to keep ANDA labeling current, we suggest that you subscribe to the daily or weekly updates of new documents posted on the CDER web site at the following address - http://service.govdelivery.com/service/subscribe.html?code=USFDA_17.

To facilitate review of your next submission please provide a side-by-side comparison of your proposed labeling with the last approved labeling of the Reference Listed Drug with all differences annotated and explained.

COUGH SUPPRESSANT
12 Hour Cough Relief
Contains No Fever Reducer or Pain Reliever
Alcohol-free
Orange-Flavored Liquid
USES: Temporarily relieves ■ cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants ■ the impulse to cough to help you get to sleep.
DIRECTIONS: SHAKE BOTTLE WELL BEFORE USING.
Measure only with dosing cup provided. Do not use dosing cup with other products. Dose as follows or as directed by a doctor.
Adults and Children 12 years of age and over: 10 mL every 12 hours, not to exceed 20 mL in 24 hours.
Children 6 to under 12 years of age: 5 mL every 12 hours, not to exceed 10 mL in 24 hours.
Children 4 to under 6 years of age: 2.5 mL every 12 hours, not to exceed 5 mL in 24 hours.
Children under 4 years of age: Do not use.
WARNINGS: Do not take this product for chronic cough that lasts as occurs with smoking, asthma, or emphysema, or if cough occurs with too much phlegm (mucus) unless directed by a doctor. If cough lasts more than 7 days, cough comes back, or occurs with fever, rash or headache that lasts, consult a doctor. These could be signs of a serious condition.
If pregnant or breast-feeding, ask a health professional before use.
Keep out of reach of children. In case of overdose, get medical help or contact a Poison Control Center right away.
DRUG INTERACTION PRECAUTION: Do not use if you are now taking a prescription monoamine oxidase inhibitor (MAOI) (certain drugs for depression, psychiatric or emotional conditions, or Parkinson's disease), or for 2 weeks after stopping the MAOI drug. If you do not know if your prescription drug contains an MAOI, ask a doctor or pharmacist before taking this product.
ACTIVE INGREDIENT: Each 5 mL contains dextromethorphan polistirex equivalent to 30 mg dextromethorphan hydrobromide.
OTHER INFORMATION: Each 5 mL contains: sodium 7 mg.
Store at 20°-25°C (68°-77°F).
Dosing cup provided.

FROM: Sarah Nguyen FDA CONTACT PHONE: (240)-276-8467

Dear Sir:

This facsimile is in reference to your abbreviated new drug application dated January 9, 2009, submitted pursuant to Section 505(j) of the Federal Food, Drug, and Cosmetic Act for Dextromethorphan Polistirex Extended Release Oral Suspension, 30 mg/5 mL.

Reference is also made to your amendment dated May 6, May 18, June 12, and July 23, 2009.

The Division of Chemistry has completed its review of the submission(s) referenced above and has identified deficiencies which are presented on the attached **__4__** pages. This facsimile is to be regarded as an official FDA communication and unless requested, a hard copy will not be mailed.

Your amendment should respond to all of the deficiencies listed. **Facsimiles or partial replies will not be considered for review**, nor will the review clock be reactivated until all deficiencies have been addressed. The response to this facsimile will be considered to represent a MINOR AMENDMENT and will be reviewed according to current OGD policies and procedures. Your cover letter should clearly indicate that the response is a ***QUALITY MINOR AMENDMENT / RESPONSE TO INFORMATION REQUEST*** and should appear prominently in your cover letter.

We also request that you include a copy of this communication with your response. Please direct any questions concerning this communication to the project manager identified above.

SPECIAL INSTRUCTIONS:

Please submit your response in electronic format.
This will improve document availability to review staff.

CHEMISTRY COMMENTS TO BE PROVIDED TO THE APPLICANT

B. In addition to responding to the deficiencies presented above, please note and acknowledge the following comments in your response:

1. Please update your room temperature stability data and provide all available data in your next amendment.

2. The review of the labeling and bioequivalence portions of your application are pending. After the reviews are complete, any deficiencies found will be communicated to you under separate covers.

3. The firms referenced in the application relative to the manufacture and testing of the product must be in compliance with cGMPs at the time of approval.

4. Please be advised that the use of in-house or modified compendial analytical methods for testing the drug substance does not relieve you from meeting the compendial standards. In the event of a dispute, the official USP methods will prevail.

Sincerely yours,

(See appended electronic signature page)

Subject: RE: ANDA 91-135: request for permission to use (b) (4) for service of notice letter
Date: Thursday, May 14, 2009 3:05:57 PM

Mr. Weiss,

It is permissible to use (b) (4) in lieu of the US Postal service for the purpose of providing notice to the NDA holder and any patent assignees associated with PIV certifications contained within ANDA 91-135.

Regards,

Martin Shimer

Subject: ANDA 91-135: request for permission to use (b) (4) for service of notice letter

Dear Mr. Shimer:

I am outside counsel to Tris Pharma, Inc., which has received an accepted for filing letter for its ANDA 91-135 (Dextromethorphan Polistirex Extended Release Suspension). By this e-mail, I request permission to send the notice letter and detailed statement by (b) (4) overnight courier to the NDA holder and patent owner, instead of sending them by Certified or Registered Mail.

If this is acceptable, please let me know by return e-mail.

Thank you in advance for your time and consideration.

Very truly yours,
Charles A. Weiss
for Tris Pharma, Inc.

BIOEQUIVALENCE AMENDMENT

ANDA 91-135

OFFICE OF GENERIC DRUGS, CDER, FDA
Document Control Room, Metro Park North II
7500 Standish Place, Room 150
Rockville, MD 20855-2773 (240-276-9327)

APPLICANT: Tris Pharma, Inc. TEL: (732) 940-0358

ATTN: W. Scott Groner FAX: (732) 940-0374

FROM: Teresa Vu FDA CONTACT PHONE: (240) 276-8782

Dear Sir:

This facsimile is in reference to the bioequivalence data submitted on August 14, 2009, pursuant to Section 505(j) of the Federal Food, Drug, and Cosmetic Act for Dextromethorphan Suspension, 30 mg/5 mL.

The Division of Bioequivalence has completed its review of the submission(s) referenced above and has identified deficiencies which are presented on the attached __1__ page. This facsimile is to be regarded as an official FDA communication and unless requested, a hard-copy will not be mailed.

You should submit a response to these deficiencies in accord with 21 CFR 314.96. Your amendment should respond to all the deficiencies listed. **Facsimiles or partial replies will not be considered for review.** Your cover letter should clearly indicate:

Bioequivalence Response to Information Request **Bioequivalence Dissolution Acknowledgement**

If applicable, please clearly identify any new studies (i.e., fasting, fed, multiple dose, dissolution data, waiver or dissolution waiver) that might be included for each strength. We also request that you include a copy of this **communication with your response.**
Please submit a copy of your amendment in an archival (blue) jacket and unless submitted electronically through the gateway, a review (orange) jacket. Please direct any questions concerning this communication to the project manager identified above.

Please remember that when changes are requested to your proposed dissolution methods and/or specifications by the Division of Bioequivalence, an amendment to the Division of Chemistry should also be submitted to revise the release and stability specification. We also recommend that supportive dissolution data or scientific justification be provided in the CMC submission to demonstrate that the revised dissolution specification will be met over the shelf life of the drug product.

SPECIAL INSTRUCTIONS:

Please submit your response in electronic format. This will improve document availability to review staff.

BIOEQUIVALENCE DEFICIENCY

ANDA: 91-135

APPLICANT: Tris Pharma Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension, 30 mg /5 mL

The Division of Bioequivalence has completed its review of the dissolution portion of the submission acknowledged on the cover sheet. The review of the bioequivalence studies will be conducted later. The following deficiency has been identified:

Based on the dissolution testing data you submitted, we agree that your proposed dissolution method is appropriate for your test product. We also agree with your proposed dissolution method and specifications for the sampling times of 1 and 6 hours. However, the specifications for the sampling time points at 3 hours and 12 hours are not acceptable. Based on the data submitted, we recommend more appropriate specifications. Please provide acknowledgement for your acceptance of the following FDA-recommended specifications for your proposed dissolution method:

Apparatus:	USP II (Paddle)
Speed of Rotation:	50 rpm
Medium:	0.1 N HCl with addition of 400 mL of Phosphate Buffer after 1 hr.
Volume:	500 mL
Temperature:	37 °C ± 0.5 °C
Specifications:	1 hr: NMT (b) (4) %
	3 hrs: (b) (4) %
	6 hrs: (b) (4) %
	12 hrs: NLT (b) (4) %.

Sincerely yours,

{See appended electronic signature page}

BIOEQUIVALENCE AMENDMENT

ANDA 91-135

OFFICE OF GENERIC DRUGS, CDER, FDA
Document Control Room, Metro Park North II
7500 Standish Place, Room 150
Rockville, MD 20855-2773 (240-276-9327)

APPLICANT: Tris Pharma, Inc. TEL: (732) 940-0358

ATTN: W. Scott Groner FAX: (732) 940-0374

FROM: Steven Mazzella FDA CONTACT PHONE: (240) 276-8782

Dear Sir:

This facsimile is in reference to the bioequivalence data submitted on January 9, 2009, pursuant to Section 505(j) of the Federal Food, Drug, and Cosmetic Act for Dextromethorphan Extended Release Oral Suspension, 30 mg/5 mL.

The Division of Bioequivalence has completed its review of the submission(s) referenced above and has identified deficiencies which are presented on the attached **1** page. This facsimile is to be regarded as an official FDA communication and unless requested, a hard-copy will not be mailed.

You should submit a response to these deficiencies in accord with 21 CFR 314.96. Your amendment should respond to all the deficiencies listed. **Facsimiles or partial replies will not be considered for review**, nor will the review clock be reactivated until all deficiencies have been addressed. Your cover letter should clearly indicate that the response is a "Bioequivalence Amendment" and clearly identify any new studies (i.e., fasting, fed, multiple dose, dissolution data, waiver or dissolution waiver) that might be included for each strength. We also request that you include a copy of this communication with your response. Please submit a copy of your amendment in both an archival (blue) and a review (orange) jacket. Please direct any questions concerning this communication to the project manager identified above.

Please remember that when changes are requested to your proposed dissolution methods and/or specifications by the Division of Bioequivalence, an amendment to the Division of Chemistry should also be submitted to revise the release and stability specification. We also recommend that supportive dissolution data or scientific justification be provided in the CMC submission to demonstrate that the revised dissolution specification will be met over the shelf life of the drug product.

SPECIAL INSTRUCTIONS:

Please submit your response in electronic format.
This will improve document availability to review staff.

ANDA: 91-135

APPLICANT: Tris Pharma Inc.

DRUG PRODUCT: Dextromethorphan Polistirex Extended Release Oral Suspension 30 mg /5 mL

The Division of Bioequivalence has completed its review of the dissolution portion of the submission acknowledged on the cover sheet. The review of the bioequivalence studies will be conducted later. The following deficiency has been identified:

Your dissolution testing using your proposed method is incomplete. Please provide the final pH of your dissolution medium after 400 mL of phosphate buffer was added. In addition, please conduct and submit dissolution testing on the test and reference products (12 dosage units each) using the following FDA-recommended method:

Apparatus:	USP II (Paddle)
Speed of Rotation:	50 rpm
Medium:	0.1 N HCl
Volume:	500 mL
Temperature:	37 °C ± 0.5 °C

The recommended sampling times are 30, 60, 90, and 180 minutes or until at least 80% of the labeled amount of the drug is dissolved. Your proposed method will be evaluated in comparison with the FDA-recommended method when the dissolution data from both methods are available.

Please also conduct and submit dissolution testing data using USP Apparatus II (Paddles) at 50 rpm in at least three additional dissolution media (pH 4.5 and 6.8 buffers and water). The following sampling times are recommended: 1, 2, and 4 hours and every 2 hours thereafter, until at least 80% of the labeled amount of the drug is dissolved.

Comparative dissolution profiles of all additional dissolution testing should include individual dosage unit data as well as the mean, range, and standard deviation at each time point for twelve dosage units of each lot tested. Please also provide summary tables for the dissolution testing data in eCTD table format.

Sincerely yours,

Guidance on Dextromethorphan Polistirex

This guidance represents the Food and Drug Administration's (FDA's) current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. You can use an alternative approach if the approach satisfies the requirements of the applicable statutes and regulations. If you want to discuss an alternative approach, contact the Office of Generic Drugs.

Active ingredient: Dextromethorphan Polistirex

Form/Route: Extended Release Oral Suspension /Oral

Recommended studies: 2 studies

1. Type of study: Fasting
   Design: Single-dose, two-way crossover *in-vivo*
   Strength: 30 mg/5 mL
   Subjects: Normal healthy males and females, general population.
   Additional Comments:

---

2. Type of study: Fed
   Design: Single-dose, two-way crossover *in-vivo*
   Strength: 30 mg/5 mL
   Subjects: Normal healthy males and females, general population.
   Additional comments:

Analytes to measure (in appropriate biological fluid): Dextromethorphan and its metabolite Dextrorphan in plasma.

Bioequivalence based on (90% CI): Dextromethorphan
Please submit the metabolite data as supportive evidence of comparable therapeutic outcome. For the metabolite, the following data should be submitted: individual and mean concentrations, individual and mean pharmacokinetic parameters, and geometric means and ratios of means for AUC and Cmax.

Waiver request of in-vivo testing: Not Applicable

Dissolution test method and sampling times:
Please note that a **Dissolution Methods Database** is available to the public at the OGD website at http://www.fda.gov/cder/ogd/index.htm. Please find the dissolution information for this product at this website. A dosage unit for a suspension is the labeled strength (5 ml). A total of 12 units from 12 different bottles should be used.

In addition to the method above, for modified release products, dissolution profiles on 12 dosage units each of test and reference products generated using USP Apparatus I at 100 rpm and/or Apparatus II at 50 rpm in at least three dissolution media (pH 1.2, 4.5 and 6.8 buffer) should be submitted in the application. Agitation speeds may have to be increased if appropriate. It is acceptable to add a small amount of surfactant, if necessary. Please include early sampling times of 1, 2, and 4 hours and continue every 2 hours until at least 80% of the drug is released, to provide assurance against premature release of drug (dose dumping) from the formulation. Specifications will be determined upon review of the data submitted in the application.

Finalized May 2008

COMMENTS

OGD is requesting a pharmacology/toxicology consult for the following 2 inactives: Sodium polystyrene sulfonate and (b) (4). The data for the former is located in EDR under section 4.2.3. The data for the latter is located in DMF (b) (4). Also note the for (b) (4) previous pharm/tox consult was submitted under ANDA (b) (4) and DMF (b) (4).

Please provide your analysis and recommendation if the levels proposed for SPS (b) (4) and (b) (4) is justified for use in this drug product at a maximum daily dose of 20 mL.

Please cc Theresa Liu, HFD-617 (Theresa.Liu@fda.hhs.gov) on the review when it is being checked into DFS. Thank you.

DEPARTMENT OF HEALTH & HUMAN SERVICES

Food and Drug Administration
Rockville, MD 20857

ANDA 91-135

Tris Pharma, Inc.
Attention: W. Scott Groner
2033 Route 130
Monmouth Junction, NJ 08852

Dear Sir:

We acknowledge the receipt of your abbreviated new drug application submitted pursuant to Section 505(j) of the Federal Food, Drug and Cosmetic Act.

Reference is made to our facsimile dated April 29, 2009 and your correspondence dated May 5, 2009.

NAME OF DRUG: Dextromethorphan Polistirex Extended-release Suspension, 30 mg/5 mL

DATE OF APPLICATION: January 9, 2009

DATE (RECEIVED) ACCEPTABLE FOR FILING: January 12, 2009

You have filed a Paragraph IV patent certification, in accordance with 21 CFR 314.94(a)(12)(i)(A)(4) and Section 505(j)(2)(A)(vii)(IV) of the Act. Please be aware that you need to comply with the notice requirements, as outlined below. In order to facilitate review of this application, we suggest that you follow the outlined procedures below:

CONTENTS OF THE NOTICE

You must cite section 505(j)(2)(B)(ii) of the Act in the notice and should include, but not be limited to, the information as described in 21 CFR 314.95(c).

SENDING THE NOTICE

In accordance with 21 CFR 314.95(a):

- Send notice by U.S. registered or certified mail with return receipt requested to each of the following:

  1) Each owner of the patent or the representative designated by the owner to receive the notice;

  2) The holder of the approved application under section 505(b) of the Act for the listed drug claimed by the patent and for which the applicant is seeking approval.

  3) An applicant may rely on another form of documentation only if FDA has agreed to such documentation in advance.

DOCUMENTATION OF NOTIFICATION/RECEIPT OF NOTICE

You must submit an amendment to this application with the following:

- In accordance with 21 CFR 314.95(b), provide a statement certifying that the notice has been provided to each person identified under 314.95(a) and that notice met the content requirements under 314.95(c).

- In accordance with 21 CFR 314.95(e), provide documentation of receipt of notice by providing a copy of the return receipt or a letter acknowledging receipt by each person provided the notice.

- A designation on the exterior of the envelope and above the body of the cover letter should clearly state "PATENT AMENDMENT". This amendment should be submitted to your application as soon as documentation of receipt by the patent owner and patent holder is received.

DOCUMENTATION OF LITIGATION/SETTLEMENT OUTCOME

You are requested to submit an amendment to this application that is plainly marked on the cover sheet “PATENT AMENDMENT” with the following:

- If litigation occurs within the 45-day period as provided for in section 505(j)(4)(B)(iii) of the Act, we ask that you provide a copy of the pertinent notification.

- Although 21 CFR 314.95(f) states that the FDA will presume the notice to be complete and sufficient, we ask that if you are not sued within the 45-day period, that you provide a letter immediately after the 45 day period elapses, stating that no legal action was taken by each person provided notice.

- You must submit a copy of a copy of a court order or judgment or a settlement agreement between the parties, whichever is applicable, or a licensing agreement between you and the patent holder, or any other relevant information. We ask that this information be submitted promptly to the application.

If you have further questions you may contact Martin Shimer, Chief, Regulatory Support Branch, at (240) 276-8419.

We will correspond with you further after we have had the opportunity to review the application.

Please identify any communications concerning this application with the ANDA number shown above.

Should you have questions concerning this application, contact:

Leigh Ann Bradford
Project Manager
(240) 276-8453

Sincerely yours,

{See appended electronic signature page}

Additional Comments regarding the ANDA:

1. Tris Pharma, Inc. submitted an electronic application for Dextromethorphan Polistirex Extended Release Oral Suspension, eq. to dextromethorphan hydrobromide 30 mg/5 mL. The reference listed drug (RLD) is DELSYM® Extended Release Suspension (NDA #18-658, approval date October 8, 1982) manufactured by Reckitt Benckiser. DELSYM® temporarily relieves cough due to minor throat and bronchial irritation as may occur with the common cold or inhaled irritants.

2. Based on the **Guidance for Industry: Individual Product Bioequivalence Recommendations**, the recommendations for Dextromethorphan Polistirex (finalized May 2008) are:

Contains Nonbinding Recommendations
Guidance on Dextromethorphan Polistirex

> This guidance represents the Food and Drug Administration's (FDA's) current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. You can use an alternative approach if the approach satisfies the requirements of the applicable statutes and regulations. If you want to discuss an alternative approach, contact the Office of Generic Drugs.

Active ingredient: Dextromethorphan Polistirex
Form/Route: Extended Release Oral Suspension /Oral
Recommended studies: 2 studies

1. Type of study: Fasting
Design: Single-dose, two-way crossover *in-vivo*
Strength: 30 mg/5 mL
Subjects: Normal healthy males and females, general population.
Additional Comments:

---

2. Type of study: Fed
Design: Single-dose, two-way crossover *in-vivo*
Strength: 30 mg/5 mL
Subjects: Normal healthy males and females, general population.
Additional comments:

Analytes to measure (in appropriate biological fluid): Dextromethorphan and its metabolite Dextrorphan in plasma.

Bioequivalence based on (90% CI): Dextromethorphan
Please submit the metabolite data as supportive evidence of comparable therapeutic outcome. For the metabolite, the following data should be submitted: individual and mean concentrations, individual and mean pharmacokinetic parameters, and geometric means and ratios of means for AUC and Cmax.
Waiver request of in-vivo testing: Not Applicable
Dissolution test method and sampling times:
Please note that a **Dissolution Methods Database** is available to the public at the OGD website at http://www.fda.gov/cder/ogd/index.htm. Please find the dissolution information for this product at this website.
A dosage unit for a suspension is the labeled strength (5 ml). A total of 12 units from 12 different bottles should be used.
In addition to the method above, for modified release products, dissolution profiles on 12 dosage units each of test and reference products generated using USP Apparatus I at 100 rpm and/or Apparatus II at 50 rpm in at least three dissolution media (pH 1.2, 4.5 and 6.8 buffer) should be submitted in the application. Agitation speeds may have to be increased if appropriate. It is acceptable to add a small amount of surfactant, if necessary. Please include early sampling times of 1, 2, and 4 hours and continue every 2 hours until at least 80% of the drug is released, to provide assurance against premature release of drug (dose dumping) from the formulation.
Specifications will be determined upon review of the data submitted in the application.

3. Tris Pharma, Inc. submitted fasting and fed studies for Dextromethorphan Polistirex ER Oral Suspension. Results for plasma concentrations of Dextromethorphan and its metabolite, Dextrorphan, are reported.

4. The 90% C.I. values for fasting and fed bioequivalence studies of Dextromethorphan and Dextrorphan meet the 80%-125% BE criteria.

5. The firm also provided multimedia dissolution testing.

Note to the Reviewer:

- The Module 2.7.1.3 Statistical Summary of the Comparative Bioavailability Data for Dextromethorphan is inaccurately reported for fed BE study results. The Module 5.3.1.2.1 Legacy Study Report accurately reports the AUC and Cmax values for Dextromethorphan in fed BE studies.

Note to the Regulatory Group:

- Please request the Test Article Inventory from the firm.

DEPARTMENT OF HEALTH AND HUMAN SERVICES
PUBLIC HEALTH SERVICE
FOOD AND DRUG ADMINISTRATION
CENTER FOR DRUG EVALUATION AND RESEARCH

DATE : March 9, 2009

TO : Director
Division of Bioequivalence (HFD-650)

FROM : Chief, Regulatory Support Branch
Office of Generic Drugs (HFD-615)

SUBJECT: Examination of the bioequivalence study submitted with an ANDA 91-135 for Dextromethorphan Polistirex Extended-Release Oral Suspension, 30 mg/5 mL to determine if the application is substantially complete for filing and/or granting exclusivity pursuant to 21 USC 355(j)(5)(B)(iv).

Tris Pharma has submitted ANDA 91-135 for Dextromethorphan Polistirex Extended-Release Oral Suspension, 30 mg/5 mL. The ANDA contains a certification pursuant to 21 USC 355(j)(5)(B)(iv) stating that patent(s) for the reference listed drug will not be infringed by the manufacturing or sale of the proposed product. Also it is a first generic. In order to accept an ANDA that contains a first generic, the Agency must formally review and make a determination that the application is substantially complete. Included in this review is a determination that the bioequivalence study is complete, and could establish that the product is bioequivalent.

Please evaluate whether the request for study submitted by Tris Pharma on January 9, 2009 for its Dextromethorphan Polistirex product satisfies the statutory requirements of "completeness" so that the ANDA may be filed.

A "complete" bioavailability or bioequivalence study is defined as one that conforms with an appropriate FDA guidance or is reasonable in design and purports to demonstrate that the proposed drug is bioequivalent to the "listed drug".

This is a representation of an electronic record that was signed electronically and this page is the manifestation of the electronic signature.
