Dear Dr. Hansen:

Please refer to your supplemental new drug application (sNDA) dated April 17, 2024, submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FDCA) for Lumakras (sotorasib) tablets.

We acknowledge receipt of your major amendment dated September 16, 2024, which extended the goal date by three months.

This Prior Approval supplemental new drug application adds a new indication of Lumakras, in combination with panitumumab, for the treatment of adult patients with KRAS G12C-mutated metastatic colorectal cancer as determined by an FDA approved test, who have received prior fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy. This supplement also provides for updates to the U.S. Prescribing Information (USPI) Dosage and Administration sections (2.1, Patient Selection; 2.2, Recommended Dosage and Administration; 2.3, Dosage Modifications for Adverse Reactions) and to the Warning and Precautions sections (Section 5.1, Hepatotoxicity; Section 5.2, Interstitial Lung Disease [ILD]/Pneumonitis).

APPROVAL & LABELING

We have completed our review of this application, as amended. It is approved, effective on the date of this letter, for use as recommended in the enclosed agreed-upon labeling.

WAIVER OF ½ PAGE LENGTH REQUIREMENT FOR HIGHLIGHTS

Please note that we have previously granted a waiver of the requirements of 21 CFR 201.57(d)(8) regarding the length of Highlights of Prescribing Information.

CONTENT OF LABELING

As soon as possible, but no later than 14 days from the date of this letter, submit the content of labeling [21 CFR 314.50(l)] in structured product labeling (SPL) format using the FDA automated drug registration and listing system (eLIST), as described at FDA.gov.¹ Content of labeling must be identical to the enclosed labeling (text for the Prescribing Information and Patient Package Insert), with the addition of any labeling changes in pending “Changes Being Effectuated” (CBE) supplements, as well as annual reportable changes not included in the enclosed labeling.

Information on submitting SPL files using eList may be found in the guidance for industry *SPL Standard for Content of Labeling Technical Qs and As*.²

The SPL will be accessible from publicly available labeling repositories.

Also within 14 days, amend all pending supplemental applications that include labeling changes for this NDA, including CBE supplements for which FDA has not yet issued an action letter, with the content of labeling [21 CFR 314.50(l)(1)(i)] in Microsoft Word format, that includes the changes approved in this supplemental application, as well as annual reportable changes. To facilitate review of your submission(s), provide a highlighted or marked-up copy that shows all changes, as well as a clean Microsoft Word version. The marked-up copy should provide appropriate annotations, including supplement number(s) and annual report date(s).

REQUIRED PEDIATRIC ASSESSMENTS

Under the Pediatric Research Equity Act (PREA) (21 U.S.C. 355c), all applications for new active ingredients (which includes new salts and new fixed combinations), new indications, new dosage forms, new dosing regimens, or new routes of administration are required to contain an assessment of the safety and effectiveness of the product for the claimed indication in pediatric patients unless this requirement is waived, deferred, or inapplicable.

Because this drug product for this indication has an orphan drug designation, you are exempt from this requirement.
